

Q2 2017

Interim report for the second quarter 2017

Second quarter 2017 compared with first quarter 2017

- Strong profit driven by higher income
- Increased mortgage volumes supported net interest income
- Net commission income benefited from higher card and asset management income
- Net gains and losses on financial items positively affected by higher FX trading activity
- Costs in line with expectations
- Additional provisions in oil related sectors
- Strong capitalisation

“During the second quarter we made several strategic decisions and implemented initiatives to create value-added for our customers.”

Birgitte Bonnesen,
President and CEO

¹⁾ One-off income from sale of Hemnet of SEK 680m during first quarter 2017.

²⁾ One-off income from VISA, SEK 2 115m during first half year 2016 of which Net gains and losses on financial items at fair value SEK 457m and Other income SEK 1 658m.

³⁾ Other income in the table above includes the items Net insurance, Share of profit or loss of associates, and Other income from the Group income statement.

CEO Comment

During the second quarter we made several strategic decisions and implemented initiatives to create value-added for our customers.

We signed an agreement to acquire PayEx, a Swedish payment service provider with a breadth and depth of expertise. PayEx will complement and strengthen our product offering in an area that is important to the bank and our customers. In addition, the company's strong innovative capabilities fit well with our values and will help keep us in the forefront with world-class payment solutions.

We also entered into a strategic partnership with the independent equity broker Kepler Cheuvreux that enables us to offer high-quality solutions in equity research and distribution.

Availability is very important to our customers. In the second quarter we launched a new Internet bank and Mobile bank with several additional functions. We also expanded the hours of our customer service centre, which is now open 24 hours a day, seven days a week, for both private and corporate customers.

Swedbank works to inspire customers and make it easier for them to make sustainable financing and investment choices. As proof of the success of our long-term sustainability work, 14 of Swedbank Robur's funds received the highest marks in a global climate impact rating by Climetrics. In May we launched another sustainability fund, Swedbank Robur Ethica Företagsobligationsfond, to complement the Ethica family with a sustainable corporate bond fund with a European focus.

To promote innovation and entrepreneurship, we launched a campaign in Sweden in June called Rivstart ("Flying Start"), an important aim of which is to identify and reward business ideas that clearly benefit society. Ten winners will receive seed capital and coaching to realise their ideas. We know how important new businesses are to local communities around the country.

All these initiatives deliver value to customers and make Swedbank a natural partner. Our long-term strategic focus is on continuing to develop solutions that create value-added for our customers.

Macroeconomic conditions are bright

Optimism has increased in many of the world's economies. In Europe the recovery is continuing. We also saw political risks decline somewhat in the quarter after several key elections, paving the way for continued growth. The UK's exit from the EU creates uncertainty, however.

Several of the world's central banks are now beginning to focus on how and when to phase out the stimulus measures taken during the financial crisis. The US Federal Reserve, for example, raised its benchmark rate in the second quarter.

The Swedish economy is being driven by consumer spending and an active housing market, and indicators point to continued strength during the quarter. In the

Baltic countries growth increased with support from improved global conditions.

The need for further reforms internationally to create more balanced economic and social development is great, especially in the labour and housing markets. While we also face challenges in Sweden, we are in an excellent position to address them and turn them into opportunities.

Solid profitability creates a sustainable business

Our profit for the second quarter was strong. Net interest income rose thanks to the continued growth of the mortgage portfolio. Increased customer activity in cards and payments and an upswing in equity prices improved net commission income. We were pleased to see the great interest from customers in our new equity fund, Swedbank Robur Microcap, which we launched in the quarter. The fund, which focuses on innovative Nordic startups, has already attracted nearly SEK 800m.

Lending to private customers in the Baltic countries continued to increase, mainly in mortgages. Smart ID, which was launched in the first quarter and facilitates digital identification and signatures, already has 174 000 users. The solution delivers value to customers and offers great business potential as mobile banking continues to grow.

Corporate lending decreased slightly in the quarter due to repayments. At the same time customer activity in FX trading and funding was high.

The situation in the oil sector has not changed appreciably. We increased credit impairments for our oil exposures in the second quarter. Swedbank's lending to the oil sector represents only a small share, just over 1 per cent, of our total lending. Credit quality in the rest of the loan portfolio remains high.

The financial results for the second quarter once again demonstrate Swedbank's sustainable profitability. Profit generates capital and allows us to support our customers when they need us, while also building up buffers should the market decline. In the second quarter we had a return on equity of 15.6 per cent and a Common Equity Tier 1 capital buffer that exceeded the Swedish Financial Supervisory Authority's minimum requirement by 2.6 percentage points.

Full speed ahead – high level of activity continues

After a positive and eventful quarter, we are now focused on the second half of the year with the goal to create more customer value. We will be taking several important steps, especially in our work to fully digitise the mortgage loan process. This autumn we will also begin planning for next year. I look forward to a very busy autumn with a high level of activity.

Overview

Market

The European economic recovery continued in the second quarter and political risks have declined after last spring's elections in the Netherlands, France and the UK. The UK's upcoming exit from the EU creates uncertainty, however. In the US economic indicators were somewhat weaker than estimated, while the labour market continued to improve. Against the backdrop of falling US unemployment, now below 4.5 per cent, the Federal Reserve raised the target range for its benchmark interest rate to 1.00–1.25 per cent in June and signalled that it will gradually reduce its bond holdings. Uncertainty about US fiscal policy, including President Trump's promised tax cuts and infrastructure investments, persists.

The ECB left its key interest rate unchanged at the latest monetary policy meeting in May. Expectations of a gradually less expansionary policy have grown, however, following statements by ECB President Mario Draghi and stronger European macro data, which strengthened the euro against the dollar. The Swedish krona weakened against the euro but rose against the dollar in the quarter. Long-term bond yields rose in the eurozone, while US long-term yields fell slightly. Oil prices dropped in the second quarter despite OPEC's decision in May to extend production cutbacks until March of next year. A further increase in US oil production contributed to a global surplus.

The Swedish economy grew at a slightly slower rate in the first quarter than at the end of last year and GDP rose by 2.2 per cent on an annualised, calendar adjusted basis. Growth was driven by consumer spending and a big increase in housing investment, while export growth declined slightly. Tendency surveys such as the Purchasing Managers' Index and the National Institute of Economic Research's Economic Tendency Indicator show that the economy remained strong in the second quarter, which was also reflected in the labour market. In May 92 000 more people were working than in the same month a year earlier. Unemployment fell slightly to 6.7 per cent at the same time that the labour shortage became more widespread, mainly in construction but also in private services. Inflation and inflation expectations rose, though some of that increase can be attributed to temporary factors such as rising energy prices and a weaker krona. Inflation adjusted for interest rate effects, CPIF, was 1.9 per cent in June. Underlying inflation, CPIF excluding energy, was 1.9 per cent in the same month.

House prices in Sweden dipped slightly in the second quarter compared with the first, at the same time that residential construction was at the highest level since the days of the Million Homes Programme in the 1960s and 1970s. The introduction of the amortisation requirement in June 2016 and declining house prices helped to reduce the annual growth rate for residential mortgages to 7.1 per cent in May. In late May the Swedish Financial Supervisory Authority (SFSA) proposed a stricter amortisation requirement for households that borrow more than 4.5 times their gross income. Despite the slowdown in May, credit growth still exceeded wage growth, contributing to a further rise in household debt-to-income.

Growth in the Baltic economies further strengthened in the first quarter. The increase was strongest in Estonia, where GDP rose by 4.4 per cent compared with the first quarter of 2016, the largest gain in four years. In Latvia GDP rose by 4.0 per cent and in Lithuania by 3.9 per cent. Baltic exports benefited from an improved global market. Investments, which recovered at the end of last year in all three Baltic countries thanks to increased flows from the EU's structural funds, received further support in the second quarter from improved export conditions and higher domestic industrial production. Consumer spending was driven by higher wages and falling unemployment. The inflation rate in May was 3.3 per cent in Estonia, 3.2 per cent in Lithuania and 2.8 per cent in Latvia.

Important to note

The interim report contains alternative performance measures that Swedbank considers valuable information for the reader, since they are used by the executive management for internal governance and performance measurement as well as for comparisons between reporting periods. Further information on the alternative performance measures used in the interim report can be found on page 53.

Group development

Result second quarter 2017 compared with first quarter 2017

Swedbank reported profit of SEK 4 746m in the second quarter of 2017, compared with SEK 5 124m in the previous quarter. The first quarter included a tax-exempt capital gain of SEK 680m on the sale of Hemnet. Excluding Hemnet income rose in every business area. FX changes increased profit by SEK 43m.

The return on equity was 15.6 per cent (15.9) and the cost/income ratio was 0.38 (0.38). Profit for the period and lower average capital due to the share dividend in the second quarter positively affected the return. In the first quarter the return was positively affected by the Hemnet gain.

Income decreased by 2 per cent to SEK 10 393m (10 651), mainly because other income was positively affected by Hemnet in the first quarter. Excluding Hemnet income rose by 4 per cent. FX changes increased income by SEK 93m.

Net interest income rose by 2 per cent to SEK 6 090m (5 971). An increase in Swedish mortgage lending volumes had a positive effect. The margins on the mortgage portfolio were stable. Net interest income from deposits was positively affected by improved margins due to higher market interest rates. A decrease in the resolution fund fee of SEK 83m and an extra day in the quarter also had a positive effect. The resolution fund fee for 2017 ultimately decided by the Swedish National Debt Office was lower than previously estimated.

Net commission income increased by 6 per cent to SEK 3 000m (2 822). Card income was seasonally higher. Asset management income increased, mainly thanks to rising equity prices. An extra day in the quarter also contributed positively.

Net gains and losses on financial items at fair value rose to SEK 567m (486). Increased income from FX trading contributed positively.

Other income decreased to SEK 736m (1 372) because the Hemnet sale positively affected the previous quarter by SEK 680m.

Expenses fell slightly to SEK 3 966m (4 003). Variable staff costs were lower than in the first quarter.

Credit impairments amounted to SEK 400m (339), mainly due to increased provisions within Large Corporates & Institutions for oil related commitments. Swedish Banking and Baltic Banking reported minor losses.

The tax expense amounted to SEK 1 276m (1 181), corresponding to an effective tax rate of 21.2 per cent (18.7). The difference in the effective tax rate between quarters is because the first quarter was affected by the tax-exempt capital gain on the Hemnet sale. Excluding this gain the effective tax rate would have been 21.0 per cent in the first quarter. The Group's effective tax rate is estimated at 20-22 per cent in the medium term.

Result January-June 2017 compared with January-June 2016

Profit fell to SEK 9 870m, compared with SEK 10 581m in the first half of 2016. The decrease is mainly because one-off income was higher in the first half of 2016 (sale of Visa Europe) than the same period in 2017 (sale of Hemnet). FX changes increased profit by SEK 61m.

Excluding one-off income profit increased to SEK 9 190m (8 466), as shown in the table below.

	Jan-Jun 2017	Jan-Jun 2017 excl. one- off income Hemnet	Jan-Jun 2016	Jan-Jun 2016 excl. one- off income VISA
Income statement, SEKm				
Net interest income	12 061	12 061	11 013	11 013

Share of profit or loss of associates of which VISA	379	379	2 120 1 658	462
Other income ¹⁾ of which Hemnet	1 729 680	1 049	984	984
Total income	21 044	20 364	20 834	18 719
Total expenses	7 969	7 969	7 666	7 666
Impairments	742	742	582	582
Operating profit	12 333	11 653	12 586	10 471
Tax expense	2 457	2 457	1 998	1 998
Profit for the period attributable to the shareholders of Swedbank AB	9 870	9 190	10 581	8 466
Return on equity	15,7	14,6	17,4	13,9
Cost/Income ratio	0,38	0,39	0,37	0,41

¹⁾ Other income in the table above includes the items Net insurance and Other income from the Group income statement.

The return on equity was 15.7 per cent (17.4) and the cost/income ratio was 0.38 (0.37). Excluding one-off income the return on equity was 14.6 per cent (13.9).

Income increased to SEK 21 044m (20 834). Excluding one-off items it rose by SEK 1 645m. FX changes increased income by SEK 167m.

Net interest income rose by 10 per cent to SEK 12 061m (11 013). Higher lending volumes and margins on Swedish mortgages contributed positively. An increase in the resolution fund fee of SEK 282m had a negative effect on net interest income. The Swedish National Debt Office doubled the fee compared with 2016.

Net commission income rose by 7 per cent to SEK 5 822m (5 440). Higher asset management income due to rising equity prices and increased card income contributed positively, while lower commissions from Corporate Finance had a negative effect.

Net gains and losses on financial items at fair value fell to SEK 1 053m (1 277), mainly because income related to the Visa Europe sale had a positive effect in the first half of 2016.

Other income decreased to SEK 2 108m (3 104), because one-off income was higher in the first half of 2016.

Expenses rose to SEK 7 969m (7 666) due to increased pension costs and salary increases.

Credit impairments increased to SEK 739m (573), mainly due to increased provisions for oil related commitments within Large Corporates & Institutions. Swedish Banking reported credit impairments while Baltic Banking reported net recoveries.

The tax expense amounted to SEK 2 457m (1 998), corresponding to an effective tax rate of 19.9 per cent (15.9). The effective tax rate for 2017 has been positively affected by the tax-exempt capital gain on the Hemnet sale, but negatively by the elimination of the deductibility of interest on subordinated liabilities in 2017. The same period in 2016 was positively affected by tax-exempt income from the sale of Swedbank's shares in Visa Europe. The Group's effective tax rate is estimated at 20-22 per cent in the medium term.

Volume trend by product area

Swedbank's main business is organised in two product areas: Group Lending & Payments and Group Savings.

Lending

Total lending to the public, excluding repos and the Swedish National Debt Office, increased by SEK 13bn to SEK 1 470bn (1 457) compared with the first quarter. Compared with 30 June 2016 the increase was SEK 50bn, or growth of 3.5 per cent.

Loans to the public excl. the Swedish National Debt Office and repurchase agreements, SEKbn

of which Baltic Banking	65	65	63
of which Large Corporates & Inst.	202	200	186
Total	1 470	1 457	1 420

Lending to Swedish mortgage customers within Swedish Banking increased by SEK 11bn to SEK 737bn (726) compared with 31 March. In Baltic Banking mortgage volume grew by 1.4 per cent in local currency to the equivalent of SEK 65bn.

Other private lending, including to tenant-owner associations, grew by SEK 2bn in the quarter.

Swedbank's Swedish consumer loan volume amounted to SEK 31bn, corresponding to a market share of about 10 per cent. Consumer loans include unsecured loans as well as loans secured by a car or boat. The Baltic consumer loan portfolio grew in the quarter by 3 per cent in local currency to the equivalent of around SEK 7.5bn.

Corporate lending fell by a total of SEK 1bn in the quarter to SEK 516bn. Corporate lending decreased by SEK 3bn within Swedish Banking and grew by SEK 2bn within Large Corporates & Institutions. Within Baltic Banking corporate lending decreased slightly in local currency.

For more information on lending, see page 36 of the Fact book.

Payments

The total number of cards in issue from Swedbank at the end of the quarter was 8.0 million, unchanged compared with the end of the first quarter. Compared with the second quarter of 2016 the number of cards in issue increased by 1.2 per cent.

In Sweden the number of cards in issue was 4.2 million at the end of the second quarter. Compared with the same period in 2016 corporate card issuance increased by 0.9 per cent and consumer card issuance by 2.0 per cent. The increase in the number of consumer cards is largely driven by the growing number of young people who are signing up for cards. The bank's many small business customers offer further growth potential in the corporate card issuance business. In the Baltic countries the number of cards in issue was 3.8 million.

	30 Jun 2017	31 Mar 2017	30 Jun 2016
Number of cards			
Issued cards, million	8,0	8,0	7,9
of which Sweden	4,2	4,2	4,1
of which Baltic countries	3,8	3,8	3,8

A total of 317 million purchases were made in Sweden with Swedbank cards in the second quarter, an increase of 7 per cent compared with the second quarter of 2016.

In the Baltic countries there were 121 million card purchases, an increase of 12 per cent.

The number of acquired card transactions also increased year-on-year. In the Nordic countries the number of acquired card transactions was 619 million in the second quarter, an increase of 8 per cent compared with the second quarter of 2016. In the Baltic countries the corresponding figures were 89 million and 9 per cent.

Card payments in stores for the market in total was over 85 per cent in Sweden and over 50 per cent in Estonia, while the figures were slightly lower in Latvia and Lithuania. Swedbank is working actively to increase card payments in stores by encouraging more retailers to accept cards and advising customers to pay by card in stores instead of cash.

To make it easier for customers to pay for small purchases by card, Swedbank offers contactless cards. The launch began in the Baltic countries in 2016 and is continuing gradually in Sweden in 2017 for various types of cards. At the same time payment terminals at stores are being upgraded to accept contactless cards. In the Baltic countries more than 50 per cent of terminals support contactless payments. In Sweden the corresponding figure is currently around 20 per cent, but the number of terminals with contactless functionality is expected to grow quickly and reach more than 50 per cent of stores in 2018.

The number of domestic payments handled by Swedbank rose by 16 per cent in Sweden and by 1 per cent in the Baltic countries compared with the second quarter of 2016. Swedbank's market share of payments through the Bankgiro system was 37 per cent. The number of international payments rose by 8 per cent in Sweden and 15 per cent in the Baltic countries compared with the second quarter of 2016.

To better capitalise on emerging opportunities in e-commerce, Swedbank has created a new unit, Commerce, within Group Lending & Payments, which will focus on providing retailers with comprehensive payment solutions. We have also signed an agreement to acquire the payment service provider PayEx and are now awaiting approval from regulatory authorities. The acquisition complements Swedbank's payment and financing services and creates further opportunities to continue developing attractive long-term payment services for retailers and their customers.

Savings

Total deposits within the business segments – Swedish Banking, Baltic Banking and Large Corporates & Institutions – increased by SEK 1bn to SEK 805bn (804) compared with the end of the first quarter. Of this total, 58 per cent (58) related to on demand deposits. Total deposits from the public, including volumes attributable to Group Treasury within Group Functions & Other, decreased by SEK 10bn in the quarter to SEK 888bn.

Swedbank's deposits from private customers increased by SEK 15bn in the quarter to SEK 457bn (442). Within Swedish Banking deposits increased by SEK 12bn partly due to a tax refund during the quarter.

Deposits from the public excl. the Swedish National Debt Office and repurchase agreements, SEKbn	30 Jun 2017	31 Mar 2017	30 Jun 2016
Deposits, private	457	442	427

of which Baltic Banking	67	69	67
of which Large Corporates & Inst.	126	146	126
of which Group Functions & Other	83	94	172
Total	888	898	936

Corporate deposits decreased by a total of SEK 25bn in the quarter. Deposits within Large Corporates & Institutions decreased by SEK 20bn, mainly due to withdrawals of temporary deposits by financial institutions. In Swedish Banking deposits increased by SEK 8bn and in Baltic Banking they decreased by SEK 2bn. Deposits within Group Treasury decreased by SEK 11bn largely due to lower volumes from US money market funds.

The market share for household deposits in Sweden was stable at 21 per cent as of 31 May (21 per cent as of 31 December 2016). The market share for corporate deposits fell slightly to 19 per cent (20). For more information on deposits, see page 37 of the Fact book.

Asset management, SEKbn	30 Jun 2017	31 Mar 2017	30 Jun 2016
Assets under management	840	833	726
Assets under management, Robur	835	829	721

of which Baltic countries	39	37	31
of which Norway			4
Assets under management, Other, Baltic countries	5	5	4
Discretionary asset management	386	383	367

Fund assets under management by Swedbank Robur continued to rise in the second quarter to SEK 835bn as (829bn) of 30 June, of which SEK 796bn (791) relates to the Swedish fund business. The increase is due to higher asset values. Fund assets under management by Swedbank Robur's Baltic business increased to SEK 39bn (37) due to rising asset values and positive net flows.

The total net inflow to the Swedish fund market was SEK 33.4bn in the quarter, of which SEK 8.1bn was in equity funds, SEK 9.0bn in mixed funds, SEK 15.0bn in fixed income funds and SEK 1.3bn in hedge funds and other funds.

After a positive start to the year, Swedbank Robur's net inflow in the Swedish fund market was negative in the second quarter at SEK -5.6bn (SEK 2.6bn in the first quarter). The negative flow is primarily due to capital reallocations by institutional investors. The net flow from Swedish Banking and the savings banks, including insurance, improved to SEK 3.9bn (1.8).

The net flow in the Baltic countries stayed positive in the second quarter at SEK 1.1bn (1.3).

By assets under management, Swedbank Robur is the largest player in the fund markets of Sweden and the Baltic countries. In Sweden the market share was 21 per cent as of 30 June. The market share was 41 per

cent in Estonia, 42 per cent in Latvia and 37 per cent in Lithuania.

Two new funds were launched in the second quarter: Microcap, an equity fund specialising in innovative Nordic startups, and Ethica Företagsobligationsfond, a sustainable fund that invests in European corporate bonds. The response has been positive, with net inflows of SEK 798m in Microcap, which was launched in April, and SEK 1.3bn in Ethica Företagsobligationsfond, which was launched in May.

Assets under management, life insurance SEKbn	30 Jun 2017	31 Mar 2017	30 Jun 2016
Sweden	170	167	144

of which other	9	9	9
Baltic countries	5	5	4

Life insurance assets under management in Sweden increased by SEK 3bn in the quarter to SEK 170bn. The net inflow was SEK 1.3bn.

Swedbank was the eighth largest life insurance company in Sweden in the first quarter of 2017, with a market share of about 7 per cent in premium payments excluding capital transfers. The market share for transferred capital was 9 per cent, placing Swedbank fourth. Swedbank is the largest life insurance company in Estonia and the second largest in Lithuania and Latvia. Its market shares as of 31 May were 44 per cent in Estonia, 23 per cent in Lithuania and 22 per cent in Latvia.

Credit and asset quality

Stable economic growth in our home markets has supported the trend towards generally low credit impairments. Oil related sectors face continued uncertainty, however. The major oil companies are still reluctant to invest due to the low oil prices. Swedbank continues to carefully follow the sector's development and maintains a close dialogue with impacted customers.

Credit impairments amounted to SEK 400m in the quarter (SEK 339m in the first quarter) and mainly related to provisions for anticipated credit impairments for existing commitments in the oil related sector. Credit impairments in others sectors remained very low.

Credit impairments, net by business segment SEKm	Q2 2017	Q1 2017	Q2 2016
Swedish Banking	86	-3	-35
Baltic Banking	7	-66	50
Estonia	10	-10	57
Latvia	2	-27	2
Lithuania	-5	-29	-9
Large Corporates & Institutions	307	408	545
Group Functions & Other			-22
Total	400	339	538

The credit impairment ratio was 0.10 per cent (0.09 as of 31 March). The share of impaired loans (gross) increased in the quarter to 0.53 per cent (0.50) of total lending. The total provision ratio for impaired loans was

45 per cent (51). For more information on asset quality, see pages 39-45 of the Fact book.

New residential construction in Sweden is the highest in many years and is leading to increased mortgage volumes. While new construction has caught up with demand in some locations, the housing shortage still persists in many metropolitan areas and is pushing prices higher. Volume and prices are rising more slowly than before, however, partly due to the amortisation requirement introduced last year. Swedbank supports the SFSA's proposal for a tighter amortisation requirement for households with high debt. The effects of the new proposal are expected to correspond to the effects of the debt to income cap the bank already applies.

Swedbank's Swedish mortgages increased by 1.5 per cent in the quarter, or 6.1 per cent on an annual basis. This is a lower growth rate than in previous years and lower than the market in total. The average loan-to-value ratio of Swedbank's mortgages was 53 per cent (54) in Sweden, 48 per cent (48) in Estonia, 82 per cent (86) in Latvia and 67 per cent (67) in Lithuania, based on property level. For new lending in the quarter the loan-to-value ratio was 68 per cent in Sweden, 68 per cent in Estonia, 74 per cent in Latvia and 74 per cent in Lithuania. Amortisations in the Swedish mortgage portfolio amounted to about SEK 13bn in the last 12-month period. For more information, see pages 46-47 of the Fact book.

Operational risks

No incidents occurred in the second quarter that significantly impacted our customers. In late May the bank suffered a payment-related disruption, due to which payments had to be handled manually for about three hours, causing some delays.

The bank's safeguards effectively blocked the global cyberattacks in the quarter. Losses related to operational risks remained low.

Funding and liquidity

In the second quarter Swedbank stayed active in the international bond markets. The bank took advantage of favourable market conditions and chose to fund future maturities early on. Swedbank issued SEK 29bn in long-term debt, of which SEK 27bn related to covered bond issues. The total issuance volume for 2017 is expected to be slightly higher than in 2016. Maturities for the full-year 2017 are nominally SEK 166bn from the beginning of the year. Issuance plans are mainly affected by changes in deposit volumes and lending growth and are adjusted over the course of the year.

Outstanding short-term funding, commercial paper and Certificates of Deposit included in debt securities in issue, amounted to SEK 159bn as of 30 June (SEK 230bn as of 31 March 2017). At the same time SEK 435bn (408) was placed with central banks. The liquidity reserve amounted to SEK 559bn (593) as of 30 June. The Group's liquidity coverage ratio (LCR) was 128 per cent (137), and for USD and EUR was 161 and 192 per cent respectively. The net stable funding ratio (NSFR) was 110 per cent (109). For more information on funding and liquidity, see notes 15-17, and pages 56-71 of the Fact book.

Ratings

During the second quarter there were no changes in Swedbank's ratings.

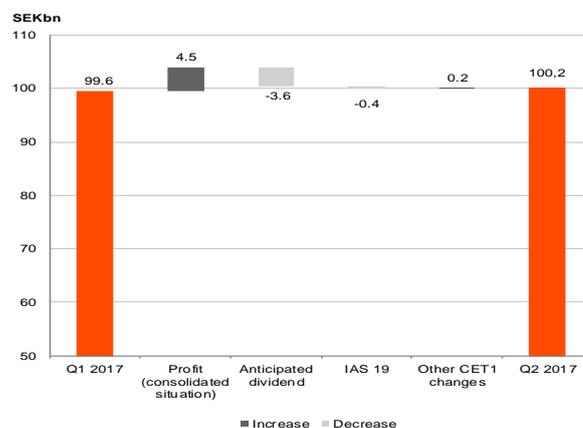

Capital and capital adequacy

Capital ratio

The Common Equity Tier 1 capital ratio was 24.6 per cent on 30 June (24.2 per cent as of 31 March). Common Equity Tier 1 capital increased by SEK 0.7bn during the quarter to SEK 100.2bn. Profit, after deducting the proposed dividend, positively affected Common Equity Tier 1 capital by SEK 0.9bn. The revaluation of the estimated pension liability according to IAS 19 reduced Common Equity Tier 1 capital by about SEK 0.4bn, mainly due to experience-based actuarial losses.

In May Swedbank issued a EUR 650m Tier 2 loan to optimise its capital structure. The issue has a 10.5-year maturity with a redemption option after 5.5 years. The issue strengthened Swedbank's total capital ratio by 1.5 percentage points.

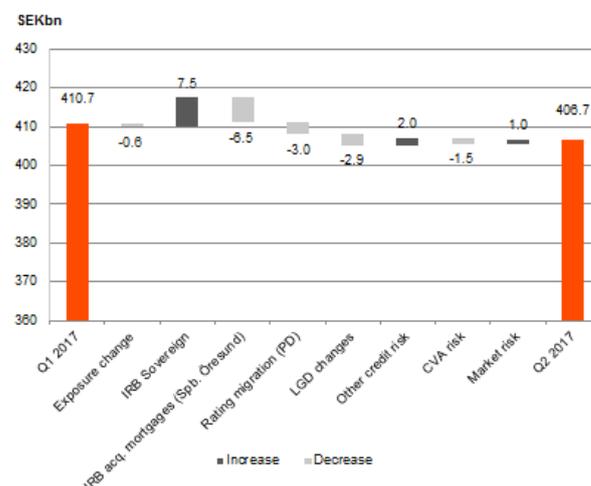

Change in Common Equity Tier 1 capital, 2017, Swedbank consolidated situation

Swedbank's leverage ratio as of 30 June 2017 was 4.8 per cent (4.7). The ratio increased because total assets were lower at the end of the second quarter of 2017 than at the end of the first quarter of 2017.

The risk exposure amount (REA) decreased by SEK 4.0bn in the second quarter to SEK 406.7bn (410.7).

Change in REA, 2017, Swedbank consolidated situation

REA for credit risks decreased by a total of SEK 3.5bn. REA for credit valuation adjustments (CVA risk) decreased by SEK 1.5bn due to lower exposures. REA for market risks increased by SEK 1.0bn, mainly driven by higher interest rate risks in the trading book. REA for operational risks was unchanged during the quarter.

Changes in exposures increased REA for credit risk by SEK 0.4bn. This was mainly due to a switch to the IRB approach to calculate REA for two types of exposures: exposures to central governments and central banks as well as to loans obtained in connection with the acquisition of Sparbanken Öresund. As a result, the exposures' risk weights have changed. The average risk weight for exposures to central governments and central banks has risen from 0 per cent to 1.5 per cent, increasing the REA by SEK 7.5bn. The average risk weight for exposures related to converted credits from Sparbanken Öresund decreased, reducing the REA by SEK 6.5bn. The remaining decrease in the REA from exposure changes of SEK 0.6bn is mainly due to lower exposures to financial institutions.

Within REA for credit risks positive PD migrations (Probability of Default), mainly to corporates and private individuals, contributed to a decrease of SEK 3.0bn. Increased collateral values, which have a negative effect on Loss Given Default (LGD), reduced REA for credit risks by SEK 2.9bn. Other credit risk increased REA by SEK 2.0bn, mainly because additional customers defaulted on their loans before provisions could be allocated for these commitments.

Capital requirement

Swedbank's total Common Equity Tier 1 capital requirement increased in the quarter to 22.0 per cent, compared with Swedbank's Common Equity Tier 1 capital ratio of 24.6 per cent as of 30 June 2017. The requirement increased because the capital requirement with respect to the risk weight floor for mortgages in Pillar 2 increased. This was due to an increase in the volume of mortgages subject to the risk weight floor after the switch to an internal risk classification method (IRB) to calculate REA for exposures to the loans obtained through the acquisition of Sparbanken Öresund. The total requirement takes into account Swedbank's Common Equity Tier 1 capital requirement for individual Pillar 2 risks of 2.0 per cent as well as all announced increases in the countercyclical buffer values.

Future capital regulations

In November 2016 the EU Commission proposed a package of reforms to the EU's rules for banks. The proposal contained amendments in a number of areas, including the capital requirements within Pillar 2, the framework for a minimum requirement for own funds and eligible liabilities (MREL), and authorisation to reduce the own funds and eligible liabilities. The proposal also introduces a new category of debt that banks can use to fulfil the MREL.

The Resolution Act enables the Swedish National Debt Office to write down a bank's liabilities in a crisis in order to absorb losses or convert the liabilities to equity. To ensure that they have sufficient capital and liabilities to write down or convert, the banks will have to fulfil the MREL as of 1 January 2018. Swedbank currently meets this requirement.

Senior unsecured bonds will initially be considered eligible liabilities. As of 2022, however, the banks'

eligible liabilities must be subordinated to the liabilities that are excluded from write-down or conversion. The EU Commission has proposed that the EU's member states amend their national insolvency laws to introduce a new category of debt that meets this requirement. In June 2017 the EU's finance ministers decided to support the proposal. The EU Parliament is expected to rule on it in autumn 2017. If it too supports the proposal, Sweden would have to amend its Rights of Priority Act in 2018 or possibly the beginning of 2019. This would enable Swedish banks to issue debt instruments to fulfil MREL.

The Basel Committee has been working for several years to limit the international differences between banks' risk weights, including a possible capital floor for banks that use internal models. After its meeting in June 2017 the Basel Committee announced that it had not yet finalised the rule changes but would continue its work.

Until the new rules are finalised, it remains uncertain how Swedbank will be affected. The EU must first decide whether, and if so how, they will be implemented in the EU. Thereafter Swedish lawmakers and authorities will have to decide how they will be implemented in Sweden. With its robust profitability and strong capitalisation, however, Swedbank is well positioned to meet future changes in capital requirements.

Other events

On 4 April Swedbank announced that it had entered into a partnership with and invested in the fintech company Mina Tjänster ("My Services"). Mina Tjänster's personal finances app, which is currently available in Swedish, makes it easier for people to manage their subscriptions to the services they use in their everyday lives. The partnership will give Swedbank's customers access to the tool.

On 5 May Swedbank announced that it had signed an agreement to acquire the payment service provider PayEx. The acquisition complements Swedbank's e-commerce payment solutions and creates good opportunities to continue to develop comprehensive payment solutions for retailers and their customers. The acquisition is being financed using Swedbank's own resources and is subject to the customary approvals by regulatory authorities, including the SFSA and the Swedish Competition Authority. The acquisition will have a somewhat negative impact on Swedbank's Common Equity Tier 1 capital ratio. More information on the financial effects for Swedbank will be communicated when the acquisition is completed.

On 16 May the SFSA announced its decision to close the ongoing supervision case against Swedbank involving conflicts of interest without taking any measures. Initiated in December 2015, the case was a result of private investments made by a few members of the former Group Executive Committee. Since December 2015 Swedbank has taken measures to improve the internal procedures on conflicts of interest.

On 19 June Swedbank announced that it had entered into a strategic partnership with Europe's leading independent equity broker, Kepler Cheuvreux. The partnership combines Swedbank's advisory skills and Equity Capital Markets ("ECM") relationships with Kepler Cheuvreux's research expertise and distribution reach.

Through the partnership, the bank's customers gain access to one of the market's largest high-quality research footprints in the Nordics, covering over 900 European stocks, including 300 Nordic. Swedbank is investing in a 6 per cent equity stake in Kepler Cheuvreux and will have one seat on the board of directors.

On 26 June Carina Strand was appointed Head of Group HR and a member of the Group Executive Committee. She will take on her new role at Swedbank on 1 October and is currently Head of HR at IBM Sweden.

On 30 June Charlotte Elsnitz was appointed Head of the business area Baltic Banking and joined the Group Executive Committee. She was previously CFO for Baltic Banking.

Events after 30 June 2017

On 13 July the Swedish Competition Authority decided to approve Swedbank's acquisition of PayEx. Swedbank now also awaits the SFSA's and the Norwegian Competition Authority's approval before the acquisition can be completed.

Swedish Banking

- Continued positive trend in mortgage volumes and lower resolution fund fee supported net interest income
- Increased card commissions and asset management income strengthened net commission income
- New version of the Internet bank and Mobile bank with expanded functions for mortgages and consumer loans

Result

Second quarter 2017 compared with first quarter 2017

Profit decreased to SEK 2 985m (3 499), mainly due to one-off income of SEK 680m from the sale of Hemnet in the first quarter.

Net interest income rose by 4 per cent to SEK 3 792m (3 637). Increased mortgage volumes positively affected net interest income. The margins in the mortgage portfolio were stable. Slightly higher margins in corporate lending also had a positive effect. Net interest income from deposits were positively affected by improved margins owing to higher market interest rates. A lower resolution fund fee contributed positively.

Household mortgage volume amounted to SEK 737bn at the end of the quarter, an increase of SEK 11bn. As of 31 May 2017 the share of the year's net mortgage growth was 17 per cent and the total market share was 24.6 per cent (24.8 per cent as of 31 December 2016).

Corporate lending decreased by SEK 3bn to SEK 249bn (252), of which SEK 105bn was loans to property management companies.

The market share, including corporate lending within Large Corporates & Institutions, was 17.7 per cent in May (18.4 per cent as of 31 December 2016).

Household deposit volume increased by SEK 12bn in the quarter, partly due to the tax refund in June. Swedbank's share of household deposits was 20.7 per cent as of 31 May 2017 (20.8 per cent as of 31 December 2016).

Corporate deposits within Swedish Banking increased by SEK 8bn in the quarter. Swedbank's market share, including corporate lending within Large Corporates & Institutions, was 19.0 per cent as of 31 May (20.3 per cent as of 31 December 2016).

Net commission income rose by 7 per cent to SEK 1 881m (1 757), mainly due to increased asset management income resulting from higher equity prices

and net inflows to funds as well as increased card commissions.

Other income decreased, mainly due to the sale of Hemnet in the first quarter.

Total expenses were stable. Staff costs decreased slightly, while maintenance costs for premises increased in the quarter.

Credit impairments of SEK 86m were reported in the second quarter, compared with net recoveries of SEK 3m in the first quarter. The credit impairments are mainly due to a number of corporate customers in various sectors.

January-June 2017 compared with January-June 2016

Profit increased to SEK 6 484m (5 167) thanks to increased income.

Net interest income increased by 10 per cent to SEK 7 429m (6 733), mainly through increased lending volumes and mortgage margins. This was offset by the transfer of business volumes and financial results for a number of large corporate customers to Large Corporates & Institutions in the first quarter of 2017 and a higher resolution fund fee compared with 2016.

Net commission income increased by 9 per cent to SEK 3 638m (3 343). The increase was mainly due to higher equity prices and net inflows to funds as well as increased card commissions.

Other income increased, mainly due to the sale of Fastighetsbyråns holding in Hemnet.

Total expenses were stable.

Credit impairments of SEK 83m were reported during the period, compared with net recoveries of SEK 48m in the first half of 2016. The credit impairments are mainly due to a number of corporate customers in various sectors.

Business development

Swedish Banking introduced a new regional organisation during the quarter with four regions instead of five. The aim is to improve coordination and efficiency to meet the changing needs of customers, more of whom are banking through the bank's digital channels and by phone through our customer service centre. The service centre is now open 24 hours a day, 7 days a week, for both private customers and businesses.

During the quarter we launched our new Internet bank and Mobile bank, which have a new uniform design and expanded functions for mortgages and consumer loans.

We have entered into a partnership with the personal finances app Mina Tjänster ("My Services"), where users can easily manage their subscriptions and contracts. We have also launched a new social online investing platform for customers in collaboration with the US fintech company Sprinklebit.

On the corporate side we have launched a campaign called Swedbank Rivstart ("Flying Start"), which includes a contest that runs until 31 August 2017. The purpose of the contest is to find new entrepreneurs with strong business ideas and a desire to make society a little better. Ten winners will each receive SEK 250 000 in seed capital and support to develop and implement their ideas.

Christer Trägårdh
Head of Swedish Banking

Sweden is Swedbank's largest market, with around 4 million private customers and more than 250 000 corporate customers. This makes it Sweden's largest bank by number of customers. Through our digital channels (Internet Bank and Mobile Bank), the Telephone Bank and branches, and with the cooperation of savings banks and franchisees, we are always available. Swedbank is part of the community. Branch managers have a strong mandate to act in their local communities. The bank's presence and engagement are expressed in various ways. A project called "Young Jobs", which has created several thousand trainee positions for young people, has played an important part in recent years. Swedbank has 225 branches in Sweden.

Baltic Banking

- Increased lending supported net interest income
- Higher net commission income due to increased customer activity
- FX effects positively impacted profit

Result

Second quarter 2017 compared with first quarter 2017

Profit increased slightly to SEK 993m (987). Higher income was offset by credit impairments (compared with net recoveries in the previous quarter) as well as higher expenses. FX effects raised profit by SEK 14m.

Net interest income rose by 3 per cent in local currency due to higher lending income. The margins in the mortgage portfolio continued to rise somewhat, while the margins in corporate lending were stable. FX effects increased net interest income by SEK 15m.

Lending volumes rose by about 0.5 per cent in local currency. Household lending increased by 2 per cent, while corporate lending decreased. Total lending grew in all three Baltic countries.

Deposit volumes were stable in local currency. Volumes increased in Latvia but decreased in Estonia and Lithuania.

Net commission income rose by 5 per cent in local currency thanks to higher card commissions resulting from increased customer activity.

Net gains and losses on financial items decreased by 5 per cent in local currency. Other income increased by 13 per cent in local currency thanks to higher income from the insurance business.

Total expenses rose by 2 per cent in local currency mainly due to higher marketing expenses and staff costs.

Credit impairments amounted to SEK 7m, compared with net recoveries of SEK 66m in the first quarter. Estonia and Latvia reported credit impairments, while Lithuania reported net recoveries. Underlying credit quality remained strong.

January-June 2017 compared with January-June 2016

Profit increased to SEK 1 980m (1 734), mainly due to higher income. FX effects raised profit by SEK 66m.

Net interest income rose by 5 per cent in local currency. The increase was mainly due to higher lending volumes. A change in the internal allocation of fees related to the resolution fund and deposit guarantee positively affected net interest income. FX effects raised net interest income by SEK 69m.

Lending volumes rose by 3 per cent in local currency. The lending portfolio grew in all three countries, with the strongest growth in mortgages, consumer loans and private leasing.

Deposit volumes increased by 4 per cent in local currency. Growth in household deposits was strong, while corporate deposits decreased.

Net commission income rose by 7 per cent in local currency thanks to higher income from asset management, payment processing in Estonia and Latvia, and the service packages introduced in Lithuania in the fourth quarter of 2016.

Net gains and losses on financial items increased slightly in local currency, mainly due to higher income from FX trading. Other income rose by 15 per cent in local currency thanks to higher income from the insurance business.

Total expenses rose by 3 per cent in local currency. The increase is mainly due to higher staff costs and because the first half of 2016 was positively affected by a VAT refund in Lithuania. Expenses for premises and depreciation decreased.

Net recoveries amounted to SEK 59m, compared with credit impairments of SEK 8m in the first half of 2016.

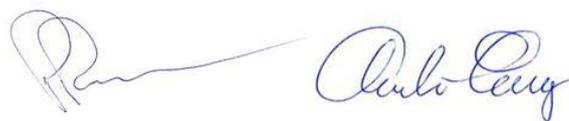

Business development

During the quarter we continued to improve functionality in our digital channels. For corporate customers we have further developed the Swedbank Gateway service to make it easier for small businesses to link their enterprise system to their bank account. For private customers we added push notifications in the Mobile Bank in June.

Smart ID, which was launched in the previous quarter, has performed strongly. The number of users rose to 174 000 in June, compared with 60 000 in March, and the number of logins during the quarter amounted to 4.6 million. With Smart ID customers can identify themselves, sign contracts and confirm payments.

According to an independent survey by Kantar Emor in May, Swedbank ranks among the ten most popular brands in all three Baltic countries. In Latvia it is the most popular brand for the third consecutive year. In Estonia Swedbank came third and in Lithuania eighth.

On 30 June Charlotte Elsnitz was appointed Head of the business area Baltic Banking and joined the Group Executive Committee. She succeeded Priit Perens, who has been given a senior position in Group Credit. Charlotte was previously CFO for Baltic Banking.

Priit Perens / Charlotte Elsnitz
Head of Baltic Banking

Swedbank is the largest bank by number of customers in Estonia, Latvia and Lithuania, with around 3.2 million private customers and over 300 000 corporate customers. According to surveys, Swedbank is also the most respected company in the financial sector. Through its digital channels (Telephone Bank, Internet Bank and Mobile Bank) and branches, the bank is always available. Swedbank is part of the local community. Its local social engagement is expressed in many ways, with initiatives to promote education, entrepreneurship and social welfare. Swedbank has 35 branches in Estonia, 36 in Latvia and 65 in Lithuania.

Large Corporates & Institutions

- Higher income due to increased customer FX trading activity and lower resolution fund fee
- Credit impairment provisions for oil related commitments
- Swedbank has entered into a strategic partnership with Europe's leading independent equity broker, Kepler Cheuvreux

Result

Second quarter 2017 compared with first quarter 2017

Profit increased to SEK 647m (448) due to increased income and lower credit impairments.

Net interest income increased by 8 per cent to SEK 892m (823), mainly due to a lower resolution fund fee. Net interest income from deposits rose due to increased volumes from financial institutions, which are charged for negative interest rates. Swedbank still charges only financial institutions for deposits in a few currencies.

Net commission income increased by 1 per cent to SEK 587m (580). The increase is mainly related to increased card income.

Net gains and losses on financial items at fair value increased by 14 per cent to SEK 515m (452). Higher income from FX trading contributed positively. Income from equity trading decreased, partly due to low activity in the market ahead of the French election. Favourable

valuation adjustments of derivative exposures also contributed positively.

Total expenses decreased by 4 per cent, mainly due to lower variable staff costs.

Credit impairments amounted to SEK 307m (408) in the second quarter, corresponding to a credit impairment ratio of 0.43 per cent. The credit impairments are attributable to provisions for oil related commitments in Norway.

January-June 2017 compared with January-June 2016

Profit decreased to SEK 1 095m (1 212). Increased income was offset by increased expenses, increased credit impairments and higher tax.

Net interest income increased by 8 per cent to SEK 1 715m (1 591). Net interest income from deposits rose due to increased volumes attributable to the transfer of a number of corporate customers from Swedish Banking. Net interest income related to deposits increased due to increased volumes from financial

institutions, which are charged for negative interest rates. A higher resolution fund fee had a negative effect.

Net commission income increased by 6 per cent to SEK 1 167m (1 101). The increase mainly relates to increased loan guarantees and guarantee commissions as well as increased custody fees. In Corporate Finance income decreased for equity issues, which was partly compensated by higher income from bond issues.

Net gains and losses on financial items at fair value increased by 1 per cent to SEK 967m (955). Low volatility in the financial markets resulted in lower income from equity and FX trading. The decrease was compensated by positive valuation adjustments of derivative exposures.

Total expenses increased by 8 per cent compared with the first half of 2016, mainly due to higher costs for staff, IT and premises.

Credit impairments amounted to SEK 715m compared with SEK 642m in the first half of 2016. The impairments were mainly attributable to increased provisions for exposures in oil related sectors. The share of impaired loans was 1.6 per cent.

Tax increased, since the first quarter of 2016 included a positive one-off tax effect.

Business development

Swedbank entered into a strategic partnership with Europe's leading independent equity broker, Kepler Cheuvreux. Together we are creating one of the Nordic region's strongest brokerages in advice, research and equity trading. Our analysts will eventually broaden coverage to around 900 European stocks, some 300 of them Nordic. Our corporate clients also gain access to a network of more than 1 200 institutional investors in Europe and the US.

Swedbank's Norwegian business has been very active and completed several major deals during the quarter. We continued to recruit key employees to replace those who left the bank's Norwegian business in February and to accommodate the higher level of activity.

As part of the new framework agreement with the Swedish National Debt Office on payment solutions for Swedish government agencies and enterprises, Swedbank, in tight competition, has become the leading supplier with a market share of about 90 per cent of all transactions. The agreement covers all 235 state agencies and enterprises and consolidates Swedbank's position as the leader in the Swedish payments market.

We have expanded our FX trading hours and now serve our clients during US trading hours as well. This autumn we expect to offer FX trading 24 hours a day as part of an effort to become the main bank for more of our major corporate clients.

Elisabeth Beskow & Ola Laurin
Co-Heads of Large Corporates & Institutions

Large Corporates & Institutions is responsible for Swedbank's offering to customers with revenues above SEK 2 billion and those whose needs are considered complex due to multinational operations or a need for advanced financing solutions. They are also responsible for developing corporate and capital market products for other parts of the bank and the Swedish savings banks. Large Corporates & Institutions works closely with customers, who receive advice on decisions that create sustainable profits and growth. Large Corporates & Institutions is represented in Sweden, Norway, Estonia, Latvia, Lithuania, Finland, Luxembourg, China, the US and South Africa.

¹⁾ Other income in the table above includes the items Net insurance and Other income from the Group income statement.

Net interest income and net gains and losses on financial items mainly stem from Group Treasury. Other income mainly refers to income from the savings banks. Expenses mainly relate to Group Lending & Payments, Group Savings and Group Staffs and are allocated to a large extent.

Second quarter 2017 compared with first quarter 2017

Profit decreased to SEK 121m (190) in the quarter. Profit within Group Treasury decreased to SEK 148m (230).

Net interest income decreased to SEK 363m (512). Net interest income within Group Treasury decreased to SEK 395m (514), mainly because the first quarter was positively affected by covered bond repurchases.

Net gains and losses on financial items improved slightly to SEK -106m (-114). Net gains and losses on financial items within Group Treasury improved to SEK -100m (-118) as a result of lower covered bond repurchases in the quarter. In addition, the first quarter was positively affected by year-end related volatility in the currency swap market.

Expenses decreased somewhat to SEK 270m (286).

January-June 2017 compared with January-June 2016

Profit decreased to SEK 311m (2 468). Group Treasury's profit decreased to SEK 378m (2 435).

Net interest income rose to SEK 875m (801). Group Treasury's net interest income increased to SEK 909m (840) due to more favourable terms for currency swaps in early 2017.

Net gains and losses on financial items at fair value decreased to SEK -220m (49). Net gains and losses on financial items within Group Treasury decreased to SEK -218m (56). The first half of 2016 was positively affected by a gain of SEK 457m on the sale of Visa Europe. Excluding the Visa effect net gains and losses on financial items increased within Group Treasury, mainly due to year-end related volatility in the currency swap market in early 2017.

The share of the profit or loss of associates decreased to SEK 27m (1 659), which is due to the Visa sale in the first half of 2016.

Expenses increased to SEK 556m (442), mainly due to higher staff and IT costs.

Group Functions & Other consists of central business support units and the product areas Group Lending & Payments and Group Savings. The central units serve as strategic and administrative support and comprise Accounting & Finance, Communication, Risk, IT, Compliance, Public Affairs, HR and Legal. Group Treasury is responsible for the bank's funding, liquidity and capital planning. Group Treasury sets the prices on all internal deposit and loan flows in the Group through internal interest rates, where the most important parameters are maturity, interest fixing period, currency and need for liquidity reserves.

For January-June 2017 an expense of SEK 898m (3 303) was recognised in other comprehensive income after tax, including remeasurements of defined benefit pension plans in associates. The 2017 expense arose primarily because market interest rates fell from year end. As per June 30 the discount rate, which is used to calculate the closing pension obligation, was 2.57 per cent, compared with 2.79 per cent at year end. The market's future inflation expectations were unchanged compared with the beginning of the year. The inflation assumption was 1.84 per cent. Actuarial losses based on experience by SEK 363m included. The fair value of plan assets increased during the first half year 2017 by SEK 81m. As a whole, the obligation for defined benefit pension plans exceeded the fair value of plan assets by SEK 2 374m.

For January-June 2017 an exchange difference of SEK 211m (1 128) was recognised for the Group's foreign net investments in subsidiaries. In addition, an exchange rate difference of SEK -56m (73) for the Group's foreign net investments in associates is included in Share related to associates. The gain related to subsidiaries mainly arose because the Swedish krona weakened during the year against the euro. The total gain of SEK 155m is not taxable. Since the large part of the Group's foreign net investments is hedged against currency risk, a loss of SEK 95m before tax arose for the hedging instruments, compared with a year-earlier loss of SEK 908m.

The revaluation of defined benefit pension plans and translation of net investments in foreign operations can be volatile in certain periods due to movements in the discount rate, inflation and exchange rates.

Balance sheet analysis

Total assets have increased by SEK 272bn from 1 January 2017. Assets increased mainly due to higher cash and balances with central banks, which rose by SEK 311bn. The increases are mainly attributable to higher deposits with the US Federal Reserve and central banks in the euro system. Deposits and borrowings from the public, excluding the National Debt Office and repos rose by a total of SEK 106bn mainly volumes from US money market funds, which increased by SEK 82bn. Interest-bearing securities, Treasury bills, decreased by SEK 55bn, and have been replaced with balances with central banks. Lending to the public, excluding the National Debt Office and repos, increased by SEK 17bn. The increase primarily relates to Sweden

of which SEK 18bn was mortgages. Lending to credit institutions increased by SEK 6bn at the same time that amounts owed to them increased by SEK 83bn. Balance sheet items related to credit institutions fluctuate over time depending on repos, among other things. The market value of derivatives decreased on both the asset and liability side, mainly due to large movements in interest rates and currencies. The increase in securities in issue was mainly a result of higher issued volumes compared with repaid short-term securities funding of SEK 64bn. Long-term securities funding increased by SEK 54bn as an effect of higher issued volumes compared with repaid funding.

During the first quarter of 2017, the associated company Hemnet AB was sold. Swedbank received a payment of SEK 649m. The capital gain was SEK 680 million.

Note 1 Accounting policies

The interim report has been prepared in accordance with IAS 34, Interim Financial Reporting. The condensed consolidated financial statements have also been prepared in accordance with the recommendations and statements of the Financial Reporting Council, the Annual Accounts Act for Credit Institutions and Securities Companies and the directives of the SFSA.

The Parent Company report has been prepared in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies, the directives of the SFSA and recommendation RFR 2 of the Financial Reporting Council.

The accounting policies applied in the interim report conform to those applied in the Annual Report for 2016, which was prepared in accordance with International Financial Reporting Standards as adopted by the European Union and interpretations thereof. There have been no significant changes to the Group's accounting policies set out in the 2016 Annual Report, except for the changes as set out below.

Changed reporting of the compensation to the Savings banks for mortgage loans

Swedbank and the Savings banks, as of 1 January 2017, changed their bilateral contract regarding how the compensation will be divided between brokerage

services and on-going administrative services for mortgages. Brokerage services costs for loans will be added to the loans acquisitions value and will be part of the loans effective interest. It causes that the transaction cost reports as a reduction of the interest income during the loans term. Costs for administrative services will be reported as an expense. Restatement of the historical comparative figures has been made according the new agreement to better illustrate trends between periods. The change affects the interest income and expenses, but not the total result. Change in presentation of revenues and expenses will be presented in the note 27.

Other IFRS changes

IFRS 17, Insurance Contracts, was issued in May 2017 and is applicable from 1 January 2021. The standard has not yet been approved by the EU. The new standard establishes principles for recognition, presentation, measurement and disclosure of insurance contracts issued. Insurance contracts in scope will be measured at current value, based on the current estimates of amounts expected to be collected from premiums and pay out for claims, benefits and expenses plus expected profit for providing insurance coverage. The impacts on the Group's financial reports are still being assessed by the Group.

Note 2 Critical accounting estimates

Presentation of consolidated financial statements in conformity with IFRS requires the executive management to make judgments and estimates that affect the recognised amounts for assets, liabilities and disclosures of contingent assets and liabilities as of the closing day as well as the recognised income and expenses during the report period. The executive management continuously evaluates these judgments and estimates, including assessing control over investment funds, the fair value of financial instruments, provisions for credit impairments, impairment testing of

goodwill, deferred taxes and defined benefit pension provisions. There have been no significant changes to the basis upon which the critical accounting policies and judgments have been determined compared with 31 December 2016.

Note 3 Changes in the Group structure

No significant changes to the Group structure occurred during the first half year 2017.

Operating segments' accounting policies

Operating segment reporting is based on Swedbank's accounting policies, organisation and management accounting. Market-based transfer prices are applied between operating segments, while all expenses within Group functions are transfer priced at cost to the operating segments. The net of services purchased and sold internally is recognised as other expenses in the income statements of the operating segments. Cross-border transfer pricing is applied according to OECD transfer pricing guidelines.

The Group's equity attributable to shareholders is allocated to each operating segment taking into account capital adequacy rules and estimated capital requirements based on the bank's Internal Capital Adequacy Assessment Process (ICAAP). All equity is allocated.

The return on allocated equity for the operating segments is calculated based on profit for the period for the operating segment (operating profit less estimated tax and non-controlling interests), in relation to average monthly allocated equity for the operating segment. For period shorter than one year the key ratio is annualised.

The Group trades derivatives in the normal course of business and to hedge certain positions with regard to the value of equities, interest rates and currencies.

The amounts offset for derivative assets and derivative liabilities include cash collateral offsets of SEK 2 520m and SEK 504m respectively.

The table above contains financial instruments measured at fair value by valuation level. The Group uses various methods to determine the fair value for financial instruments depending on the degree of observable market data in the valuation and activity in the market. Activity is continuously evaluated by analysing factors such as differences in bid and ask prices.

The methods are divided into three different levels:

- Level 1: Unadjusted, quoted price on an active market
- Level 2: Adjusted, quoted price or valuation model with valuation parameters derived from an active market
- Level 3: Valuation model where a majority of valuation parameters are non-observable and based on internal assumptions.

When financial assets and financial liabilities in active markets have market risks that offset each other, an average of bid and ask prices is used as a basis to determine the fair values of the risk positions that offset each other. For any open net positions, bid rates are applied for long positions and ask rates for short positions.

The Group has a continuous process whereby financial instruments that indicate a high level of internal estimates or low level of observable market data are captured. The process determines the way to calculate and how the internal assumptions are expected to affect the valuation. In cases where internal assumptions have a material impact on fair value, the financial instrument is reported in level 3. The process also includes an analysis and

evaluation based on the quality of the valuation data as well as whether a type of financial instrument is to be transferred between levels.

When transfers occur between fair value hierarchy levels those are reflected as taking place at the end of each quarter. There were no transfers of financial instruments between valuation levels 1 and 2 during the quarter.

Level 3 primarily contains unlisted equity instruments and illiquid options. In connection with the sale of shares in VISA Europe convertible preference shares in VISA Inc. were obtained. The shares are subject to selling restrictions for a period of up to 12 years and under certain conditions may have to be returned. Because liquid quotes are not available for the instrument, its fair value is established with significant elements of own internal assumptions and reported in level 3 as equity instruments. The options hedge changes in the market value of hybrid debt instruments, so-called structured products. Structured products consist of a corresponding option element and a host contract, which in principle is an ordinary interest-bearing bond. When the Group evaluates the level on which the financial instruments are reported, the entire instrument is assessed on an individual basis. Since the bond portion of the structured products represents the majority of the financial instrument's fair value, the internal assumptions

used to value the illiquid option element normally do not have a significant effect on the valuation and the financial instrument is typically reported in level 2. However, the Group typically hedges the market risks that arise in structured products by holding individual options. The internal assumptions used to in the valuation of the individual financial instruments are therefore of greater significance, because of which several are reported as derivatives in level 3.

For all options included in level 3 an analysis is performed based on historical movements in contract prices. Given this, it is not likely that future price movements will affect the market value for options in level 3 with more than +/- SEK 7m.

Financial instruments are transferred to or from level 3 depending on whether the internal assumptions have changed in significance to the valuation.

¹⁾ Adjustment due to the implementation of EBA's technical standards on prudent valuation. The objective of these standards is to determine prudent values of fair valued positions.

²⁾ To rectify for underestimation of default frequency in the model for corporate exposures, Swedbank has decided to hold more capital until the updated model has been approved by the Swedish FSA.

³⁾ Buffer requirement according to Swedish implementation of CRD IV

⁴⁾ CET1 capital ratio as reported, less minimum requirement of 4.5% (excluding buffer requirements) and less any CET1 items used to meet the Tier 1 and total capital requirements.

⁵⁾ Basel 1 floor based on the higher of the Basel 3 capital requirement and 80% of Basel 1 capital requirement. In the latter case the own funds is adjusted according to CRR article 500.4

The consolidated situation for Swedbank as of 30 June 2017 comprised the Swedbank Group with the

exception of insurance companies. The Entercard Group was included as well through the proportionate consolidation method.

The note contains the information made public according to the Swedish Financial Supervisory Authority Regulation FFFS 2014:12, chap. 8. Additional periodic information according to Regulation (EU) No

575/2013 of the European Parliament and of the Council on supervisory requirements for credit institutions and Implementing Regulation (EU) No 1423/2013 of the European Commission can be found on Swedbank's website: <https://www.swedbank.com/investor-relations/financial-information-and-publications/risk-report/index.htm>

Credit risks

The Internal Ratings-Based Approach (IRB) is applied within the Swedish part of Swedbank's consolidated situation, including the branch offices in New York and Oslo but excluding EnterCard and several small subsidiaries. IRB is also applied for the majority of Swedbank's exposure classes in the Baltic countries.

When Swedbank acts as clearing member, the bank calculates a capital base requirement for its pre-funded, qualifying and non-qualifying central counterparty default fund contributions.

For exposures, excluding capital requirement for default fund contributions, where IRB-approach is not applied, the standardized approach is used.

Market risks

Under current regulations capital adequacy for market risks can be based on either a standardised approach or an internal Value at Risk model, which requires the approval of the SFSA. The parent company has received such approval and uses its internal VaR model for general interest rate risks, general and specific share price risks and foreign exchange risks in the trading

book. The approval also covers operations in the Baltic countries with respect to general interest rate risks and foreign exchange risks in the trading book. Foreign exchange risks outside the trading book, i.e. in other operations, are mainly of a structural and strategic nature and are less suited to a VaR model.

These risks are instead estimated according to the standardised approach, as per the Group's internal approach to managing these risks.

Strategic foreign exchange risks mainly arise through risks associated with holdings in foreign operations.

Credit value adjustment

The risk of a credit value adjustment is estimated according to the standardised approach and was added after the implementation of the new EU regulation (CRR).

Operational risk

Swedbank calculates operational risk using the standardised approach. The SFSA has stated that Swedbank meets the qualitative requirements to apply this method.

Basel 1 floor

The transition rules state that the minimum capital requirement must not fall below 80 per cent of the requirement according to the older Basel 1 rules.

Note 23 Internal capital requirement

This note provides information on the internal capital assessment according to chapter 8, section 5 of the SFSA's regulation on prudential requirements and capital buffers (2014:12). The internal capital assessment is published in the interim report according to chapter 8, section 4 of the SFSA's regulation and general advice on annual reports from credit institutions and investment firms (2008:25).

A bank must identify measure and manage the risks with which its activities are associated and have sufficient capital to cover these risks. The purpose of the Internal Capital Adequacy Assessment process (ICAAP) is to ensure that the bank is sufficiently capitalised to cover its risks and to conduct and develop its business activities. Swedbank applies its own models and processes to evaluate its capital requirements for all relevant risks. The models that serve as a basis for the internal capital assessment evaluate the need for economic capital over a one-year horizon at a 99.9% confidence level for each type of risk. Diversification effects between various types of risks are not taken into account in the calculation of economic capital.

As a complement to the economic capital calculation, scenario-based simulations and stress tests are conducted at least once a year. The analyses provide an overview of the most important risks Swedbank is

exposed to by quantifying their impact on the income statement and balance sheet as well as the capital base and risk-weighted assets. The purpose is to ensure efficient use of capital. The methodology serves as a basis of proactive risk and capital management.

As of 30 June 2017 the internal capital assessment for Swedbank's consolidated situation amounted to SEK 29.2bn (SEK 31.3bn as of 31 March 2017). The capital to meet the internal capital assessment, i.e. the capital base, amounted to SEK 132.0bn (SEK 125.8bn as of 31 March 2017) (see Note 22). Swedbank's internal capital assessment using its own models is not comparable with the estimated capital requirement that the SFSA releases quarterly.

The internally estimated capital requirement for the parent company is SEK 24.8bn (SEK 24.9bn as of 31 March 2017) and the capital base is SEK 107.8bn (SEK 99.1bn as of 31 March 2017) (see the parent company's note on capital adequacy).

In addition to what is stated in this interim report, risk management and capital adequacy according to the Basel 3 framework are described in more detail in Swedbank's annual report for 2016 as well as in Swedbank's yearly Risk and Capital Adequacy Report, available on www.swedbank.com.

Note 24 Risks and uncertainties

Swedbank's earnings are affected by changes in the global marketplace over which it has no control, including macroeconomic factors such as GDP, asset prices and unemployment as well as changes in interest rates, equity prices and exchange rates.

In addition to what is stated in this interim report, detailed descriptions are provided in Swedbank's 2016 annual report and in the annual disclosure on risk management and capital adequacy available on www.swedbank.com

Alternative performance measures

Swedbank prepares its financial statements in accordance with IFRS as issued by the IASB, as set out in Note 1. The interim report includes a number of alternative performance measures, which exclude certain items which management believes are not representative of the underlying/ongoing performance of the business. Therefore the alternative performance measures provide more comparative information between periods. Management believes that inclusion of these measures provides information to the readers that enable comparability between periods. These alternative performance measures are set out below.

Measure	Definition	Purpose										
Net stable funding ratio (NSFR)	NSFR aims to have a sufficiently large proportion of stable funding in relation to long-term assets. The measure is governed by the EU's Capital Requirements Regulation (CRR); however no calculation methods have yet been established. Consequently, the measure cannot be calculated based on current rules. NSFR is presented in accordance with Swedbank's interpretation of the Basel Committee's recommendation (BCBS295).	This measure is relevant for investors since it will be required in the near future and as it is already followed as part of internal governance.										
Net interest margin before trading interest is deducted	Net interest margin before trading interest is deducted is calculated as Net interest income before trading interest is deducted, in relation to average total assets. The average is calculated using month-end figures, including the prior year end. The closest IFRS measure is Net interest income and can be reconciled in Note 5.	The presentation of this measure is relevant for investors as it considers all interest income and interest expense, independent of how it has been presented in the income statement.										
Allocated equity	Allocated equity is the operating segment's equity measure and is not a measure that is directly required by IFRS. The Group's equity attributable to shareholders is allocated to each operating segment based on capital adequacy rules and estimated capital requirements based on the bank's internal Capital Adequacy Assessment Process (ICAAP). The allocated equity amounts per operating segment are reconciled to the Group Total equity, the nearest IFRS measure, in Note 4.	The presentation of this measure is relevant for investors since it used by Group management for internal governance and operating segment performance management purposes.										
Return on allocated equity	Return on allocated equity for the operating segments is calculated based on profit for the period for the operating segment (operating profit less estimated tax and non-controlling interests), in relation to average allocated equity for the operating segment. The average is calculated using month-end figures, including the prior year end. The allocated equity amounts per operating segment are reconciled to the Group Total equity, the nearest IFRS measure, in Note 4.	The presentation of this measure is relevant for investors since it used by Group management for internal governance and operating segment performance management purposes.										
Effective tax rate excluding tax-exempt Hemnet income	The effective tax rate excluding the tax-exempt Hemnet disposal income is calculated as Adjusted operating profit in relation to Tax expense. Adjusted operating profit represents Operating profit excluding the non-taxable one-off Hemnet income and is reconciled to Operating profit, the nearest IFRS measure below. SEKm Q1 2017 <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 80%;">Operating profit</td> <td style="text-align: right;">6 307</td> </tr> <tr> <td>Non-taxable one-off Hemnet income</td> <td style="text-align: right;">680</td> </tr> <tr> <td>Adjusted operating profit</td> <td style="text-align: right;">5 627</td> </tr> <tr> <td>Tax expense</td> <td style="text-align: right;">181</td> </tr> <tr> <td>Adjusted effective tax rate</td> <td style="text-align: right;">21 %</td> </tr> </table>	Operating profit	6 307	Non-taxable one-off Hemnet income	680	Adjusted operating profit	5 627	Tax expense	181	Adjusted effective tax rate	21 %	The presentation of this measure is relevant for investors as it provides comparability of figures between reporting periods.
Operating profit	6 307											
Non-taxable one-off Hemnet income	680											
Adjusted operating profit	5 627											
Tax expense	181											
Adjusted effective tax rate	21 %											

Income statement measures excluding one-off VISA and Hemnet income	<p>Amounts related to Net gains and losses on financial items at fair value, Share of profit or loss of associates and other income are presented excluding the one-off income related to the VISA (2016) and Hemnet (2017).</p> <p>The amounts are reconciled to the relevant IFRS income statement lines on page 7.</p>	The presentation of this measure is relevant for investors as it provides comparability of figures between reporting periods.
Return on equity excluding VISA and Hemnet income	<p>Profit for the period allocated to shareholders excluding one-off VISA and Hemnet income in relation to average Equity attributable to shareholders' of the parent company. The average is calculated using month-end figures, including the prior year end.</p> <p>Profit for the period allocated to shareholders excluding one-off VISA (2016) and Hemnet (2017) income are reconciled to Profit for the period allocated to shareholders, the nearest IFRS measure on page 7.</p>	The presentation of this measure is relevant for investors as it provides comparability of figures between reporting periods.
Cost/Income ratio excluding VISA and Hemnet income	<p>Total expenses in relation to total income excluding one-off VISA and Hemnet income.</p> <p>Total income excluding one-off VISA (2016) and Hemnet (2016) income are reconciled to Total income, the nearest IFRS measure on page 7.</p>	The presentation of this measure is relevant for investors as it provides comparability of figures between reporting periods.
<p>Cost/Income ratio</p> <p>Credit Impairment ratio</p> <p>Loan/Deposit ratio</p> <p>Equity per share</p> <p>Provision ratio for impaired loans</p> <p>Return on equity</p> <p>Share of impaired loans, gross</p> <p>Share of impaired loans, net</p> <p>Total provision ratio for impaired loans</p>	<p>The alternative performance measures set out below are calculated from the financial statements without adjustment.</p> <p>Total expenses in relation to total income.</p> <p>Credit impairment on loans and other credit risk provisions (annualised), net, in relation to the opening balance of loans to credit institutions and loans to public after provisions.</p> <p>Lending to the public excluding Swedish National Debt Office and repurchase agreements in relation to deposits from the public excluding Swedish National Debt Office and repurchase agreements.</p> <p>Shareholders' equity in relation to the number of shares outstanding.</p> <p>Provisions for impaired loans assessed individually in relation to impaired loans, gross.</p> <p>Profit for the period (annualised) allocated to shareholders in relation to average equity attributable to shareholders' of the parent company. The average is calculated using month-end figures, including the prior year end.</p> <p>Carrying amount of impaired loans, gross, in relation to the carrying amount of loans to credit institutions and the public excluding provisions.</p> <p>Carrying amount of impaired loans, net, in relation to the carrying amount of loans to credit institutions and the public.</p> <p>All provisions (individually assessed and portfolio) for loans in relation to impaired loans, gross.</p>	The presentation of these measures is relevant for investors since they are used by Group management for internal governance and operating segment performance management purposes.

Signatures of the Board of Directors and the President

The Board of Directors and the President hereby certify that the interim report for January - June 2017 provides a fair and accurate overview of the operations, position and results of the parent company and the Group and describes the significant risks and uncertainties faced by the parent company and the companies in the Group.

Review report

Introduction

We have reviewed the interim report for Swedbank AB (publ) for the period 1 January - 30 June 2017. The Board of Directors and the President are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements (ISRE) 2410 Review of Interim Financial Information performed by the company's auditors. A review consists of making inquiries, primarily with persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with ISA and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report for the Group is not, in all material aspects, in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies and as regards the parent company in accordance the Annual Accounts Act for Credit Institutions and Securities Companies.
