

Interim report 2022

First quarter January – March

28 April 2022

Swedbank 

First quarter 2022 compared with fourth quarter 2021

- Higher corporate lending and slight increase in net interest income
- Market turbulence negatively affected net commission income and net gains and losses on financial items
- Low exposure to Russia, Belarus and Ukraine
- Continued good credit quality and low credit impairments
- Dividend of SEK 11.25 per share including special dividend approved by the Annual General Meeting – continued strong capitalisation

“In these turbulent times, Swedbank stands strong”

Jens Henriksson,
President and CEO

1) Presentation of the Income statement has been changed, see note 28.

2) Other income includes the items Net insurance, Share of profit or loss of associates and joint ventures and Other income from the Group income statement.

3) The Swedish bank tax (risk tax on credit institutions) came into force on 1 January 2022.

CEO Comment

A horrific war is being fought in Europe, causing tremendous human suffering. The war, boycotts and sanctions are affecting the global economy and leading to slower growth and higher inflation. At the same time, the shift away from fossil fuels is accelerating. The pandemic will continue to impact our markets.

In these turbulent times, Swedbank stands strong.

The hard work we have done to strengthen internal governance and control benefit the bank. As has the AML work. Our capital and liquidity position is good, enabling us to help existing and new customers meet challenges and capture opportunities.

Swedbank is a systemically important bank and contributes to a strong society in our four home markets: Estonia, Latvia, Lithuania and Sweden. Four issues will affect people and markets for a long time to come: geopolitics, the pandemic, climate change and inflation.

Estonia, Latvia and Lithuania have been working for years to move their trade away from Russia towards the EU and West. Nevertheless, their economic development will be affected by the war and by sanctions. We remain the market leader for households in all three countries. We are now focusing even more on developing strong corporate business.

As war and sanctions redraw the map of oil and gas markets, it has become obvious that our dependence on fossil fuels must be quickly reduced. Investments in sustainable energy are sure to increase and Swedbank is here to support customers in this transition.

Swedbank delivered a stable profit of SEK 4.6bn in the quarter. Net interest income rose slightly, driven by higher mortgage volumes of SEK 11bn and corporate lending of SEK 34bn. Commission income decreased due to seasonally lower card income, slower activity in the capital markets and lower equity prices. Net gains and losses on financial items fell due to increased credit spreads and negative valuation changes on derivatives related to our funding. Expenses were according to plan, and the cost cap of SEK 20.5bn and additional SEK 500m for investigations remain unchanged.

The return on equity was weighed down as usual by capital held for the shareholder dividend and amounted to 11.4 per cent, which is strong from a European perspective. Our target is still 15 per cent and we will present a plan before the end of the year on how we can reach it.

The mortgage market in Sweden was distinguished in the quarter by continued growth and tough competition. We are the market leader together with the savings

banks in terms of new lending. We remain proactive with customers and provide fast service.

When inflation rises and interest rates follow suit, Swedbank is there for customers and helps them plan their finances. We have launched new digital tools for our advisors to customise financial advice. And when a personal interaction is part of that advice, we see customer satisfaction and sales both go up.

In Estonia, Latvia and Lithuania, Swedbank is the most loved brand. We rank lower in Sweden but are climbing the fastest and were appointed star brand of the year. This is positive. But we still face challenges. Customer satisfaction in Sweden is below target for both private and corporate customers. Work is underway to deliver on our customer promise – together we make your financial life easier.

On the corporate side, we advise clients on their funding mix and are seeing increased demand for loans. We closely dialogue with agricultural customers and discuss solutions with those affected by higher costs. For its institutional clients, Swedbank Robur added more staff to meet demand from among others the managers of future pensions.

Digitisation and automation are happening everywhere in the bank to benefit customers and make us more efficient. For customers, this means a simpler financial life. The majority of our mortgage customers who apply for a bigger loan now receive updates digitally. With a new retail concept we can guide and educate customers on choosing the most convenient channel for daily banking. In Estonia, we launched digital onboarding for minors, and during the year the service will come to Latvia and Lithuania.

Teaching young people to manage money is vital to a financially sound society. Swedbank's campaign called "Talk to Your Kids About Money" has been a big hit and reflects our values and focus and the strategic direction we are taking.

Swedbank stands strong. In these turbulent times, we are there for our customers. With advice and guidance. With capital and financing. For change and for security.

Our customers' future is our focus.

Market

President Putin's war in Ukraine and sanctions have created widespread concern in the financial markets, and the robust economic recovery expected after the pandemic has failed to fully materialise. The long-term economic impact is currently difficult to predict but could be extensive at a global level. In the short term, it is leading to slower growth, higher inflation and rising interest rates. Some areas of international trade have already been impacted and global supply chain problems have worsened. Prices of energy and commodities, where Russia and Ukraine are major exporters, have soared, which has consequences for both companies and households. In the Baltic countries, and also in Sweden, inflation was already high before the war and has now accelerated. In addition, we have seen new lockdowns in China due to Covid outbreaks at the end of the quarter, and there is a risk that global growth will continue to slow.

Risk appetite in the financial markets has been low due to the growing uncertainty about the war. Equity markets have fallen and interest rates have risen. In the FX market, investors initially sought out stable currencies such as the U.S. dollar, Japanese yen and Swiss franc, while smaller currencies such as the Swedish krona lost value. The krona recovered at the end of the quarter, however.

House prices in Sweden continued to rise in the quarter despite global concerns. In March, prices were 4.4 per cent higher than at the start of the year. Prices slowed at the end of the quarter, however, and in March were unchanged. Housing activity remained strong in the quarter.

In Sweden, inflation was 6.0 per cent on an annualised basis in March. Although the government announced a support package in mid-March, most households can expect their purchasing power to decline this year. In the Baltic countries, inflation was 8–15 per cent in February on an annualised basis. When the Baltic countries replace their energy imports from Russia with more expensive alternatives, inflation will move higher.

Uncertainty relating to how central banks will act has increased. The European Central Bank (ECB) surprised the market in March by signalling a tighter monetary policy. In the U.S., the Federal Reserve raised its benchmark interest rate as expected and signalled further hikes this year.

While the Swedish and Baltic economies have recouped the growth lost during the pandemic, the war is again testing their strength. Sweden has limited trade with Russia, Ukraine and Belarus, and the Baltic countries have reduced their trade with Russia over time. As a result, the direct effect of the war is likely to be limited, though the indirect effect through major trade partners could have a bigger impact. The bank's economists estimate Swedish growth at 2.8 per cent this year, while growth in the Baltic countries is estimated at 1.5 per cent. Worsening supply chain problems and high inflation are clearly risks that could dampen growth. Sentiment among both households and companies, along with actual cost increases, could affect consumption and the willingness to invest. Supply chain bottlenecks, which have slowed production in Europe, could also further increase.

Important to note

The interim report contains alternative performance measures that Swedbank considers valuable information for the reader, since they are used by the executive management for internal governance and performance measurement as well as for comparisons between reporting periods. Further information on the alternative performance measures used in the interim report can be found on page 58.

Group development

Result first quarter 2022 compared with fourth quarter 2021

Swedbank's profit decreased to SEK 4 617m (4 835) mainly due to lower income, the introduction of the bank tax and higher credit impairments, which were partly offset by lower expenses. Foreign exchange effects positively affected profit before impairment, the Swedish bank tax and resolution fund fees by approximately SEK 46m.

The return on equity was 11.4 per cent (12.0) and the cost/income ratio was 0.44 (0.49).

Income decreased to SEK 11 455m (11 941). While net commission income and net gains and losses on financial items were lower, net interest income and other income increased slightly. Foreign exchange effects positively affected income by approximately SEK 96m.

Net interest income increased slightly in the quarter to SEK 6 762m (6 746). Underlying net interest income was positively affected by higher lending volumes, which was partly offset by slightly lower margins. The aggregate effect of Swedish mortgage volumes and margins on net interest income was unchanged. The previous quarter included compensation from the European Central Bank's liquidity loans for the third and fourth quarters, which in addition to fewer days in the quarter contributed negatively. Foreign exchange effects and a negative one-time effect within the leasing operations in the previous quarter contributed positively.

Net commission income decreased by 11 per cent to SEK 3 581m (4 020). Income from corporate finance, which was very strong in the previous quarter, fell. Due to the drop in equity prices, income from asset management fell as well. The fourth quarter also contained an annual performance-based income from asset management. Seasonal effects negatively affected income from card operations. The fourth quarter included discounts from Mastercard for both the third and fourth quarters.

Net gains and losses on financial items decreased to SEK 122m (265). The result decreased within Group Treasury mainly due to negative valuation changes on derivatives. The liquidity portfolio was also negatively affected by increased credit spreads in the quarter. Net gains and losses on financial items increased for Large Corporates & Institutions due to higher customer activity and turnover within fixed income. Negative revaluations of corporate bond holdings due to increased credit spreads contributed negatively.

Other income increased by 9 per cent to SEK 990m (910). During the quarter, the reversal of insurance

provisions had a positive impact on income. This was offset by the fact that the fourth quarter was affected by one-time income from the reversal of tax provisions attributable to Visa. Entercard's profit increased by SEK 27m compared with the previous quarter.

Expenses were seasonally lower and fell by 13 per cent to SEK 5 087m (5 842). Staff costs decreased due to staff departures in the fourth quarter. IT and marketing expenses were also lower. AML-related investigation expenses decreased to SEK 55m (92). Foreign exchange effects raised expenses by approximately SEK 50m.

Credit impairments amounted in the quarter to SEK 158m (-67). Updated macroeconomic scenarios caused an increase in credit impairments of SEK 250m. This was partly offset by reversals of expert credit adjustments related to the remaining pandemic-related effect, which exceeded new expert credit adjustments related to the geopolitical crisis.

Credit impairments by business area SEKm	Q1 2022	Q4 2021	Q1 2021
Swedish Banking	85	68	7
Baltic Banking	-11	-17	220
Estonia	-13	20	105
Latvia	0	-29	81
Lithuania	2	-8	34
Large Corporates & Institutions	77	-119	19
Group Functions & Other	7	1	0
Total	158	-67	246

The tax expense amounted to SEK 1 137m (1 139), corresponding to an effective tax rate of 19.8 per cent (19.1). The higher effective tax rate in the quarter is largely due to a lower share of taxable income in Swedbank Försäkring in the fourth quarter.

Result January – March 2022 compared with January – March 2021

Swedbank's profit decreased to SEK 4 617m (4 974) due to lower income and higher expenses. At the same time, credit impairments fell while the bank tax and resolution fund fees rose. Foreign exchange effects positively affected profit before impairment, the Swedish bank tax and resolution fees by approximately SEK 41m.

The return on equity was 11.4 per cent (12.8) and the cost/income ratio was 0.44 (0.43).

Income decreased to SEK 11 455m (11 631) and was negatively affected primarily by net gains and losses on financial items. Net interest income was stable, while net commission income and other income increased. Foreign exchange changes increased income by approximately SEK 98m.

Net interest income was largely unchanged at SEK 6 762m (6 770), where the underlying result was strengthened by volume growth and margins in total were relatively unchanged. This was offset by a positive retroactive change in the deposit guarantee in the first quarter 2021.

Net commission income increased by 7 per cent to SEK 3 581m (3 360). Income increased primarily from

cards, as well as from asset management due to an upswing in equity prices in the previous year.

Net gains and losses on financial items decreased to SEK 122m (585), mainly as a result of interest rate volatility.

Other income increased by 8 per cent to SEK 990m (916), mainly as a result of reversals of insurance provisions.

Expenses increased to SEK 5 087m (4 974) mainly as a result of higher staff costs and IT expenses. AML-related investigation expenses were lower than in the same quarter in 2021. Foreign exchange effects in the same period raised expenses by approximately SEK 58m.

Credit impairments amounted to SEK 158m (246) and are mainly explained by updated macroeconomic scenarios. Credit impairments in the first quarter 2021 were mainly due to pandemic-related expert credit adjustments within Baltic Banking.

The bank tax came into force on 1 January 2022 and is estimated at SEK 1bn for the full year.

The tax expense amounted to SEK 1 137m (1 208), corresponding to an effective tax rate of 19.8 per cent (19.5). The Group's effective tax rate remains estimated at 19-21 per cent in the medium term.

Volume trend by product area

Swedbank's main business is organised in three product areas: lending, payments and savings.

Lending

Total lending to the public, excluding repos and lending to the Swedish National Debt Office, increased by SEK 46bn to SEK 1 725bn (1 679) compared with the end of the fourth quarter 2021. Compared with the first quarter 2021 lending increased by SEK 104bn, or by 6 per cent. Foreign exchange effects positively affected lending volumes by approximately SEK 4bn compared with the end of the fourth quarter 2021 and by SEK 5bn compared with the first quarter 2021.

Loans to the public excl. the Swedish National Debt Office and repurchase agreements, SEKbn	31 Mar 2022	31 Dec 2021	31 Mar 2021
Loans, private mortgage	1 002	991	947
of which Swedish Banking	901	893	854
of which Baltic Banking	101	98	93

of which Baltic Banking	84	84	79
of which Large Corporates & Inst.	258	226	217
Total	1 725	1 679	1 621

Lending to mortgage customers within Swedish Banking increased by SEK 8bn to SEK 901bn (893) compared with the end of the fourth quarter 2021. The market share in mortgages was 23 per cent (23). Other private lending, including lending to tenant-owner associations, was unchanged in the quarter.

Baltic Banking's mortgage volume increased by 2 per cent in local currency to the equivalent of SEK 100bn at the end of the quarter.

Corporate lending in all three business areas increased by SEK 34bn in the quarter to SEK 579bn (545). In Sweden, the market share was 16 per cent (16).

Swedbank's green asset portfolio continued to grow in the quarter. Mortgages on energy class A and B properties and other certified buildings were the main contributors to the increase. Lending volume in Swedbank's green asset portfolio increased by 5 per cent to approximately SEK 47bn (45) in the quarter.

For more information on the green asset portfolio, see page 70 of the Fact book and Note S3 Sustainable finance in the annual and sustainability report. For more information on lending, see page 36 of the Fact book.

Payments

The total number of Swedbank cards in issue at the end of the quarter was 8.2 million, in line with the end of the previous quarter. In Sweden, 4.4 million cards were in issue and in the Baltic countries 3.8 million. Compared with the same quarter in 2021 corporate card issuance in Sweden grew by 3 per cent and private card issuance by 1 per cent. Compared with the same quarter in 2021 corporate card issuance in the Baltic countries grew by 2 per cent and private card issuance by 1 per cent.

	31 Mar 2022	31 Dec 2021	31 Mar 2021
Number of cards			
Issued cards, million	8.2	8.2	8.1
of which Sweden	4.4	4.4	4.3
of which Baltic countries	3.8	3.8	3.8

The number of purchases with Swedbank cards increased in Sweden by 13 per cent compared with the same quarter in 2021. A total of 318 million card purchases were made and were positively affected by the lifting of restrictions. In the Baltic countries, the number of card purchases increased by 24 per cent in the same period to 17 million, also due to the easing of restrictions.

The number of card transactions acquired by Swedbank increased by 14 per cent compared with the same quarter in 2021. In Sweden, Norway, Finland and Denmark, 796 million card transactions were acquired, up 13 per cent from the equivalent period in 2021. In the Baltic countries, the corresponding figure was 122 million, up 19 per cent.

Card transactions acquired in Sweden, Norway, Finland and Denmark amounted to SEK 188bn, an increase of 16 per cent compared with the equivalent period in 2021. Transaction volumes in the Baltic countries amounted to SEK 23.5bn, an increase of 32 per cent.

The lifting of restrictions in the Nordic and Baltic countries contributed to a strong recovery compared with the equivalent period in 2021. Higher prices of consumer staples and petrol raised transaction volumes in these sectors by 35 per cent and 5 per cent respectively. Other sectors that contributed to the recovery are restaurants, hotels and transport.

In Sweden, there were 221 million domestic payments in the first quarter, an increase of 0.9 per cent compared with the equivalent period in 2021. In the Baltic countries, 93 million domestic payments were processed, up 10 per cent compared with the same period in 2021. Swedbank's market share of payments through the Bankgiro system was 34 per cent. The number of international payments in Sweden increased

by 8 per cent compared with the same quarter in 2021 to 1.6 million. In the Baltic countries, international payments increased by 27 per cent to 5 million.

Savings

Total deposits within the business areas increased by SEK 20bn to SEK 1 281bn (1 261) compared with the fourth quarter 2021. Compared with the first quarter 2021 deposits in the business areas increased by SEK 107bn, corresponding to growth of 9 per cent. All business areas contributed to the increase compared with the previous year.

Exchange rates positively affected deposit volumes by approximately SEK 5bn compared with the fourth quarter 2021 and positively by approximately SEK 5bn compared with the first quarter 2021. Total deposits from the public, including volumes attributable to Group Treasury, amounted to SEK 1 284bn (1 261).

Discretionary asset management ¹	418	446	420
Total Assets under Management	1 818	1 967	1 746

¹) During the first quarter of 2022, a reclassification of Discretionary asset management was made in accordance with a renewed agreement from 1 January 2022. Comparative figures have been recalculated.

Assets under management in Swedbank Robur fell by 8 per cent in the quarter to SEK 1 398bn (1 519), of which SEK 1 324bn (1 443) related to Sweden, SEK 72bn (73) to the Baltic countries and SEK 3bn (3) to other markets. The decrease is mainly due to a market downturn. During the quarter, Swedbank Robur also closed its Russia fund when a correct valuation of the fund's holdings was no longer feasible.

The net outflow in the Swedish fund market amounted to SEK -35bn (82). The largest outflow was from active

equity funds at SEK -39bn, while mixed funds accounted for SEK -7bn. Other fund categories had net inflows: SEK 5bn to index funds, SEK 4bn to fixed income funds and SEK 2bn to hedge funds and other funds. In the previous quarter, the net flow was positively affected by the annual deposit from the Swedish Pensions Agency of SEK 40bn.

During the quarter, Swedbank Robur had net outflows of SEK -7bn (7) in Sweden. Swedish Banking and the savings banks had net outflows, while institutional clients contributed with a net inflow. In the previous quarter, the net flow was positively affected by the annual deposit from the Swedish Pensions Agency of SEK 5bn.

As of 1 January, Swedbank Robur further tightened its Policy for Responsible Investments. Among other things, investments in the gambling sector were excluded and the monitoring and review of ongoing sustainability work was clarified. During the quarter, the exclusion strategy was updated and now has an expanded category for certain funds where alcohol, weapons and military equipment are also excluded. In connection with this year's policy revision, Swedbank Robur has also supplemented its guidelines on the expectations it places on companies on critical issues such as children's and animal rights.

During the quarter, Swedbank Humanfond was revised and adopted a new approach. Going forward, the fund will focus entirely on investing in companies that, in Swedbank Robur's view, contribute to achieving the 17 UN Sustainable Development Goals. The fund remains free and 2 per cent of unit holders' assets are distributed annually to non-profit organisations of their choice. The fund has also shifted from investing strictly in Sweden to including various geographic regions. After the change, the fund is classified as dark green according to the EU's SFDR regulation. The Swedbank Robur Climate Impact and Global Impact funds were also classified as dark green earlier.

Net inflows in the Baltic countries amounted to SEK 1bn (2) in the quarter. Inflows were lower in all three countries. The lower inflows are an effect of the greater uncertainty surrounding the savings markets.

By assets under management, Swedbank Robur is the leader in the Swedish and Baltic fund markets. As of 31 March, the market share in Sweden was 20 per cent. The market shares in Estonia and Lithuania were 38 per cent and in Latvia 41 per cent.

Assets under management, life insurance SEKbn	31 Mar 2022	31 Dec 2021	31 Mar 2021
Sweden	302	321	274
of which collective occupational pensions	160	168	140
of which endowment insurance	94	102	88
of which occupational pensions	37	39	35
of which other	11	12	11
Baltic countries	8	8	8

Life insurance assets under management in the Swedish operations decreased by 6 per cent in the first quarter to SEK 302bn on 31 March. Premium income, consisting of premium payments and capital transfers, amounted to SEK 10bn (7) in the quarter.

For premium income excluding capital transfers, Swedbank's market share in the fourth quarter was 7 per cent (7). In the transfer market, Swedbank's market share in the fourth quarter was 9 per cent (9).

In Estonia, Latvia and Lithuania, Swedbank is the largest life insurance company. The market shares for premium payments in the first two months of the year were 48 per cent in Estonia, 21 per cent in Latvia and 25 per cent in Lithuania.

Credit and asset quality

Swedbank's credit quality remains good and despite the increased uncertainty, development in the quarter was stable. The war in Ukraine and its economic impact have not had a noticeable effect on credit quality. Swedbank's direct exposure to Russia, Ukraine and Belarus is insignificant. Indirect exposure in the form of customers with business relationships in these countries is limited and mainly consists of corporate customers in the Baltic countries and a few Finnish corporate customers that trade with or have production in Russia.

As a result of the war and sanctions, the macroeconomic outlook has deteriorated. The sectors considered most vulnerable to cost increases and lower demand are transport, manufacturing, construction, retail, and hotels and restaurants. These sectors were also affected by the pandemic and certain companies that have not yet recovered could be especially hard hit. Swedbank's lending to the most vulnerable sectors comprises approximately 7 per cent of the total loan portfolio. The agricultural sector is affected by increased costs for inputs and fuel as well. While certain customers could face liquidity problems in the near term, this sector is better able to compensate over time for the higher costs.

Provisions for potential future declines in credit quality in the form of expert credit adjustments amounted to SEK 1 715m as of 31 March 2022 (1 796 as of 31 December 2021). Redistributions were made during the quarter with increased provisions in the sectors that are expected to be hurt by the war in Ukraine, combined with reversals of certain previous expert credit adjustments related to Covid-19.

The total share of loans in stage 2, gross, amounted to 5.5 per cent (5.7), of which 3.7 per cent (3.7) was for private loans and 9.4 per cent (10.3) for corporate loans.

The share of loans in stage 3, gross, decreased to 0.34 per cent (0.37) mainly due to sold exposures in oil and offshore. The provision ratio for loans in stage 3 was 36 per cent (38).

The quality of Swedbank's mortgage portfolio, which accounts for just over half of total lending, is high and historical credit impairments are very low. Customers' long-term repayment capacity is a critical factor in lending, which leads to low risks for both the customer and the bank. The average loan-to-value ratios for the mortgage portfolio were 52 per cent in Sweden, 43 per cent in Estonia, 69 per cent in Latvia and 52 per cent in Lithuania.

Swedbank's lending to the property management sector accounts for approximately 15 per cent of the total loan portfolio. Stable cash flows and the customer's long-term ability to repay interest and amortisation are the key lending factors. Higher interest rates, coupled with

weaker economic development and the risk of lower rental income, could eventually put pressure on highly indebted real estate companies. Swedbank's portfolio is well positioned however with financially strong customers and collateral with sound loan-to-value ratios. The average loan-to-value ratio in Sweden was 53 per cent (54).

Swedbank's oil and offshore lending is limited and continued to decrease during the quarter as a result of the ongoing restructuring of the portfolio. High oil and gas prices, as well as the need to reduce dependency on Russian energy, could result in an improved investment climate in the oil and offshore industry. On the other hand, the global energy transition entails risks and long-term uncertainty. Swedbank does not directly finance the prospecting of new oil or gas fields, new refineries, new oil tankers or new customers that generate more than five per cent of their turnover from the production of coal, oil or gas. The lending restrictions on businesses that are not considered sustainable are stipulated in Swedbank's position statement on climate change.

For more information on credit exposures and credit quality, see notes 9 and 11-13 and pages 39-51 of the fact book.

Operational risks

The bank continuously monitors operational risks and is focused on those areas where the risks are viewed as highest. IT and information security risks have been a priority for some time, but work was further intensified in the first quarter due to the war in Ukraine. Continuity plans were also tested in the first quarter and additional measures were taken to strengthen resilience.

A limited number of IT incidents occurred in the quarter, which caused disruptions and affected the availability of the bank's payment services. Several measures were taken to increase IT stability, including improvements related to external suppliers. Swedbank has several ongoing initiatives to further improve operational stability and availability for customers.

Pandemic-related risks for the bank, its employees and customers have continued to decrease. After initially rising during the quarter, the number of employees who reported ill then fell. The number who work remotely has remained stable. The bank is again operating more normally in accordance with the recommendations issued by the Public Health Agency of Sweden, but is aware that the pandemic is not over and merely entering a new phase.

Funding and liquidity

The funding markets were marred in the latter part of the quarter by the war in Ukraine. Bond yields rose and credit spreads and volatility were higher. The short-term USD funding market was affected by interest rate uncertainty in the U.S. As a result, investors increasingly chose to retain liquidity or invest in shorter maturities than normal. The actions of U.S. investors also affected other currencies, leading to more expensive short-term funding in general.

Swedbank's very good liquidity position is beneficial in situations with higher uncertainty and volatility, allowing the bank to delay planned bond issues until conditions

have stabilised. In the first quarter, long-term debt issuance amounted to SEK 49bn.

As of 31 March, Swedbank's short-term funding and commercial paper in issue amounted to SEK 231bn (165). Available cash and balances with central banks and reserves with the Swedish National Debt Office amounted to SEK 424bn (355) and the liquidity reserve amounted to SEK 605bn (546). The Group's liquidity coverage ratio (LCR) was 166 per cent (163) and for USD, EUR and SEK was 159, 283 and 108 per cent respectively. The net stable funding ratio (NSFR) was 122 per cent (123).

The total issuance need for the full-year 2022 is expected to be in line with issuance volume in 2021, with a continued focus on senior unsecured bonds and senior non-preferred liabilities to meet updated MREL requirements. The rate of green bond issuance depends on the volume of green assets. Demand for the bank's financing is affected by the current liquidity situation, future maturities and changes in deposit and lending volumes, and is therefore adjusted over the course of the year. Maturities in 2022 amount to SEK 173bn calculated from the beginning of the year.

For more information on funding and liquidity, see notes 14-16 and pages 55-66 of the fact book.

Ratings

On 1 March, Moody's concluded its review for downgrade on Swedbank's deposit and senior unsecured debt ratings. Moody's confirmed Swedbank's Aa3 rating but placed the ratings on negative outlook. There were no other changes in Swedbank's ratings in the quarter. For more information on the ratings, see page 67 of the fact book.

Capital and capital adequacy

Capital ratio and capital requirement

The Common Equity Tier 1 capital ratio was 18.3 per cent (18.3) at the end of the quarter. The total Common Equity Tier 1 capital requirement, including Pillar 2 guidance, was 13.7 per cent (13.7) and the Common Equity Tier 1 capital buffer was 4.6 per cent (4.6). Common Equity Tier 1 capital increased to SEK 132.6bn (129.6) and was mainly affected by the quarterly profit and estimated dividend.

Change in Common Equity Tier 1 capital¹

¹ Refers to Swedbank consolidated situation

Risk Exposure Amount (REA)

Total REA increased to SEK 724.5bn (707.8) in the first quarter.

REA for credit risk increased due to higher lending but was partly offset by improved collateral, improved ratings and shorter maturities on corporate exposures.

REA for market risk increased due to higher market volatility. REA for CVA increased due to higher exposures.

Additional REA for article 3 of the EU's Capital Requirements Regulation (CRR) resulted in an increase of SEK 1.5bn largely due to higher probabilities of default in the model for large corporates.

Change in REA¹

¹ Refers to Swedbank consolidated situation

The leverage ratio was 5.1 per cent (5.4) and exceeded the leverage ratio requirement including Pillar 2 guidance of 3.45 per cent. The decrease is largely due to higher total assets and lower Tier 1 capital. Tier 1 capital decreased due to a lower volume of outstanding capital instruments.

Capital and resolution regulations

In the fourth quarter 2018, the Swedish FSA published a memorandum explaining its view of the European Banking Authority's (EBA) updated guidelines on banks' internal risk rating based models. In the memorandum the Swedish FSA stated that Swedish banks must adjust their internal rating based models to ensure that they continue to live up to the new requirements. The bank submitted its updated internal risk classification models to the Swedish FSA for evaluation and is awaiting a response. The implementation is expected to increase Swedbank's risk-weighted assets.

In the third quarter 2021, a revised Resolution Act came into force. The amendments are based on the EU's Bank Recovery and Resolution Directive (BRRD II), which among other things contains provisions on the minimum requirement for own funds and eligible liabilities (MREL). Owing to the amended law, the Swedish National Debt Office decided how MREL would be applied as of 1 January 2022. The phase-in will be completed by 1 January 2024. For Swedbank, the application of MREL will increase the aggregate need for senior unsecured bonds and senior non-preferred liabilities in relation to current funding.

In the third quarter 2021, the Swedish FSA announced that it will raise the countercyclical buffer rate to 1 per cent of REA. The requirement enters into force in the third quarter 2022. As a result of the pandemic, the countercyclical buffer in Sweden was lowered from 2.5 per cent to 0 per cent.

In the fourth quarter 2021, the EU Commission published its finalised Basel III proposal, also called Basel IV. The proposal contains actions to strengthen the comparability of risk-weighted capital ratios between banks in different countries and thereby reduce unjustified differences. The actions include revisions to the standardised approaches and internal models used to calculate the capital requirements for credit risk. A capital requirement floor was introduced for internal models where the risk-weighted assets may not fall below 72.5 per cent of the amount calculated using the standardised approach. The proposal also contains temporary exemptions beyond those previously proposed by the Basel Committee. The EU Commission's proposed changes would be gradually introduced in 2025 – 2030. The temporary exemptions would apply until end 2032. In the next stage the proposal will be negotiated by the European Council and the EU Parliament. The impact of the proposal is currently hard to assess.

Investigations

Swedbank AS has been informed by the Estonian Prosecutor's Office of suspected money laundering in 2014 – 2016. The criminal investigation originates from the Estonian FSA's previous investigation of Swedbank AS in 2019. The maximum fine for the suspected crime is EUR 16m.

The U.S. authorities are continuing to investigate Swedbank's historical anti-money laundering and counter-terrorist financing work and historical information disclosures. The investigations, which are being conducted by the Department of Justice (DoJ), Securities Exchange Commission (SEC), Office of Foreign Assets Control (OFAC) and Department of Financial Services in New York (DFS), are continuing and the bank is holding individual discussions with relevant authorities through our U.S. legal advisors. The investigations are at different stages and the bank cannot at this time determine any financial consequences or when the investigations will be completed.

Other events

On 21 January, Swedbank announced that it had recruited Britta Hjorth-Larsen as Chief Compliance Officer. She takes up her position on 1 August at the latest and will become a member of Swedbank's Group Executive Committee. Eva Wilhelmsson is Acting CCO from April until Britta Hjorth-Larsen takes over.

On 30 March, the Annual General Meeting elected Göran Persson, Bo Bengtsson, Göran Bengtsson, Annika Creutzer, Hans Eckerström, Kerstin Hermansson, Bengt Erik Lindgren, Anna Mossberg, Per Olof Nyman, Biljana Pehrsson, Björn Riese and Helena Liljedahl to Swedbank's Board of Directors. The Annual General Meeting elected Göran Persson as Chairman of the Board of Directors.

The Annual General Meeting also resolved in accordance with the Board's proposal to pay a dividend

of SEK 11.25 per share. This includes an extraordinary dividend of SEK 2 per share in addition to the ordinary dividend of 50 per cent of the net profit for the financial year 2021.

Events after 31 March 2022

Swedbank signed a new framework agreement with the Swedish National Debt Office on the procurement of payment services and card acquiring. The agreement applies to state authorities and comprises around 175 million transactions and SEK 6 000bn in transaction volume. The agreement applies as of 1 August 2022 until 31 July 2026 with the right to extend it for one plus one year.

Swedish Banking

- Stronger net interest income
- Volume growth and several mortgage rate increases
- Lower asset management volumes affected net commission income

Result

First quarter 2022 compared with fourth quarter 2021

Profit increased to SEK 2 991m (2 926) due to higher income and lower expenses. The introduction of the bank tax offset the profit improvement.

Net interest income increased by 6 per cent to SEK 3 924m (3 686). Higher deposit margins due to increased market interest rates had a positive effect but were partly offset by lower deposit margins. Higher deposit volumes and the fact that the previous quarter was negatively affected by customer transfers to the Large Corporates & Institutions business area contributed positively. Fewer days in the quarter negatively affected net interest income.

Household mortgage volume increased by SEK 8bn to SEK 901bn (893). Lending to tenant-owner associations increased to SEK 92bn (91) and corporate lending increased to SEK 237bn (235). Customer transfers to Large Corporates & Institutions negatively affected volumes by SEK 1bn mainly in property management and manufacturing.

Deposit volume increased to SEK 716bn (712), of which household deposits increased by SEK 12bn while corporate deposits decreased by SEK 8bn.

Net commission income decreased by 7 per cent to SEK 2 247m (2 419) mainly due to lower income from asset management. Card income also decreased due to discounts from Mastercard that positively affected the previous quarter.

Net gains and losses on financial items decreased to SEK 88m (144) mainly due to higher market interest rates on fixed income investments in Swedbank Försäkring and a positive profit effect from a CVA adjustment between Swedish Banking and Large Corporates & Institutions in the previous quarter.

Other income increased to SEK 491m (361) mainly due to higher income from Entercard and increased net insurance. Net insurance was partly affected by a revised calculation method for provisions.

Expenses decreased to SEK 2 666m (2 901) largely due to seasonally higher costs in the last quarter.

Credit impairments increased to SEK 85m (68) mainly due to higher provisions caused by a more negative macroeconomic scenario.

January – March 2022 compared with January – March 2021

Profit decreased to SEK 2 991m (3 238) mainly due to higher credit impairments and the introduction of the bank tax.

Net interest income decreased by 3 per cent to SEK 3 924bn (4 065) due to a higher deposit guarantee fee and lower lending margins caused by higher market interest rates.

Net commission income increased by 7 per cent to SEK 2 247bn (2 103) mainly due to higher card and asset management income.

Net gains and losses on financial items decreased to SEK 88bn (119) mainly due to higher market interest rates on fixed income investments in Swedbank Försäkring.

Other income was stable.

Expenses increased by 1 per cent to SEK 2 666m (2 633) mainly due to increased compliance-related expenses.

Credit impairments amounted to SEK 85m (7).

Business development

The Swedish mortgage market continued to grow in the quarter but at a somewhat lower rate than previously. The competition remains tough. Swedbank and several other lenders raised their mortgage rates in line with rising market interest rates. Work to increase availability and improve service for customers continued in the quarter.

The war in Ukraine and inflation expectations contributed to declines in the stock and bond markets. We continued to provide our customers with advice and support based on their situation and needs. We also

began helping refugees from Ukraine to become customers of the bank and part of society.

During the quarter, the “Talk to Your Kids About Money” campaign was implemented again. It was a big hit and was well received.

Parents who are private customers can now order the Mastercard Young debit card for their child through the Mobile bank or Internet bank. In addition, the majority of our customers who apply for a bigger mortgage now receive application updates digitally before the loan is paid out. For simpler banking transactions, we have also produced digital guides that can be accessed with a QR code.

The corporate business developed positively but with increased cautiousness shown by customers at the end of the quarter due to the growing economic and geopolitical uncertainty. We closely dialogue with our agricultural customers and discuss solutions with those affected by higher costs.

During the quarter, several corporate customers were able to access the new version of the Internet bank. Earlier our customers could calculate their financing needs and now new functionality enables them to submit loan applications directly through the Internet bank. We also launched a new version of the Swish corporate app.

As part of our work to slow climate change we have transitioned to debit cards made of approximately 85 per cent recycled material.

Mikael Björknert
Head of Swedish Banking

Sweden is Swedbank's largest market, with around 4 million private customers and over 300 000 corporate customers. This makes Swedbank the largest Swedish bank by number of customers. Swedish Banking offers private customers and small to medium-sized companies financial services and advice adapted to their specific situation and needs. The bank is there for them throughout their journey – from small to big. Swedbank is a digital bank with physical meeting points and satisfies customers' needs with the help of partners. We are available through digital devices, by telephone or in person, depending on what customers need help with. The bank is strongly committed to the community and invests in an inclusive future where we promote economically sustainable thinking.

Baltic Banking

- Insignificant direct and limited indirect exposures to Russia, Ukraine and Belarus
- Stable underlying net interest income and stable lending volumes
- Remains the market leader for households in all three countries with focus on building strong corporate business

Result

First quarter 2022 compared with fourth quarter 2021

Profit in the first quarter increased to SEK 1 104m (1 082). Profit decreased in local currency as lower income was not fully offset by lower expenses. Foreign exchange effects increased profit by SEK 33m.

Net interest income decreased by 4 per cent in local currency mainly due to fewer days in the quarter and because the previous quarter included the result for the third and fourth quarters from the European Central Bank's liquidity loans. Foreign exchange effects increased net interest income by SEK 42m.

Lending increased by 1 per cent in local currency. Household lending increased by 2 per cent while corporate lending decreased by 1 per cent. Foreign exchange effects positively contributed SEK 2bn.

In local currency, deposit volume decreased by 4 per cent in the quarter. Private and corporate deposits decreased. Foreign exchange effects positively contributed SEK 4bn.

Net commission income decreased by 6 per cent in local currency due to seasonally lower card usage as well as lower advisory commissions related to IPOs after the strong fourth quarter 2021.

Net gains and losses on financial items decreased and were affected in large part by revaluations of Swedbank's insurance company assets and fund holdings.

Expenses decreased by 12 per cent in local currency largely due to seasonally higher expenses in the previous quarter.

Credit impairments amounted to SEK -11m (-17).

January – March 2022 compared with January – March 2021

Profit increased to SEK 1 104m (873) mainly due to higher income and lower credit impairments, which were partly offset by higher expenses. Foreign exchange effects positively affected profit by SEK 34m.

Net interest income increased by 7 per cent in local currency. Higher lending volumes, corporate deposit fees and the result from the European Central Bank's liquidity loans all contributed. Foreign exchange effects positively affected net interest income by SEK 42m.

Lending increased by 7 per cent in local currency. Household lending increased by 8 per cent while corporate lending increased by 6 per cent. Foreign exchange effects contributed SEK 2bn.

Deposits increased by 5 per cent in local currency. Deposits from private and corporate customers increased. Foreign exchange effects positively contributed SEK 3bn.

Net commission income increased by 9 per cent in local currency mainly due to higher income from cards. Income from asset management also increased.

Net gains and losses on financial items decreased and were affected in large part by revaluations of Swedbank's insurance company assets and fund holdings.

Other income decreased by 5 per cent in local currency due to a lower result within the insurance operations.

Expenses increased by 12 per cent in local currency mainly due to higher staff costs. Expenses for AML, risk management and compliance also increased, as did investments in digital solutions. This was partly offset by cost savings in the retail network.

Credit impairments amounted to SEK -11m (220).

Business development

Sentiment was initially lower among households and businesses against the backdrop of the escalating war in Ukraine. Demand for cash increased. By the end of the quarter, private and corporate customers were both more optimistic about the economic conditions.

Baltic Banking's direct exposure to Russia, Ukraine and Belarus is insignificant. Our customers' exposures are limited and only a small share of lending is to corporate customers that are highly reliant on the Russian market.

We remain the market leader in all three Baltic countries, and with a focus on building our corporate business we play an important role in their economies.

During the quarter, the work to further tighten sanction controls was intensified and we are closely dialoguing with supervisory authorities – not least due to the new and more extensive sanctions that have been introduced against Russia and Belarus. This is complex and Swedbank continues to strive for international best practices in AML/CTF and sanctions compliance.

Swedbank provides support to those impacted by the war. We are simplifying payments to Ukraine and do not charge fees on them. We have also eliminated fees for refugees who open an account with us. Debit card fees have been removed for them as well. Swedbank also supports local charities and initiatives that organise, coordinate and provide support to Ukrainian refugees.

A new card offering for private customers was launched in Latvia. The offering includes a debit card and 10 free payments per month. Similar packages are already available in Estonia and Lithuania.

Swedbank also introduced customised offerings in the corporate app. This function had previously been available only to private customers. The range of offerings and the information provided to customers will be strengthened over time to improve their personal experience with Swedbank.

Digital onboarding for minors was launched in Estonia. Those younger than 18 can now become customers without having to visit a branch. This function will also be launched in Latvia and Lithuania later in 2022.

Jon Lidfelt
Head of Baltic Banking

Swedbank is the largest bank by number of customers in Estonia, Latvia and Lithuania, with around 3.3 million private customers and nearly 300 000 corporate customers. According to surveys, Swedbank is also the most popular brand in the Baltic countries. Through digital channels, customer centres and branches, the bank is always available. Swedbank is part of the local community. Local social engagement is expressed in many ways, with initiatives to promote education, entrepreneurship and social welfare. Swedbank has 15 branches in Estonia, 18 in Latvia and 42 in Lithuania.

Large Corporates & Institutions

- Rapid growth in corporate lending and better underlying net interest income
- Good customer activity in fixed income trading
- Higher credit provisions due to a less optimistic macroeconomic outlook

Income statement

1) Presentation of the Income statement has been changed, see note 28.

2) Other income includes the items Net insurance, Share of profit or loss of associates and joint ventures and Other income from the Group income statement.

3) Excluding the Swedish National Debt Office and repurchase agreements.

Result

First quarter 2022 compared with fourth quarter 2021

Profit decreased to SEK 583m (889) mainly due to higher credit impairments and the introduction of the new bank tax.

Net interest income decreased by 2 per cent to SEK 1 026m (1 050) since the previous quarter had been positively affected by customer transfers from the Swedish Banking business area. Fewer days in the quarter also had a negative effect. Higher lending volumes positively affected net interest income.

Net commission income decreased by 24 per cent to SEK 659m (862). Advisory commissions related to IPOs and equity issues decreased after a strong fourth quarter 2021. Income from asset management and bond trading also decreased after the previous quarter had been positively affected by performance-based income.

Net gains and losses on financial items increased to SEK 245m (73) mainly due to high customer activity and turnover in fixed income trading. Negative revaluations of corporate bond holdings due to increased credit spreads contributed negatively.

Expenses decreased by 11 per cent to SEK 1 023m (1 153) mainly due to seasonally lower IT and consulting expenses.

Credit impairments amounted to SEK 77m (-119) mainly due to higher provisions caused by a more negative macroeconomic scenario.

January – March 2022 compared with January – March 2021

Profit decreased to SEK 583m (765) mainly due to higher credit impairments and the introduction of the new bank tax.

Net interest income increased by 6 per cent to SEK 1 026m (965) mainly due to higher lending volumes, which to some extent were offset by lower

margins. A higher deposit guarantee fee negatively affected net interest income.

Net commission income decreased by 4 per cent to SEK 659m (685), partly due to lower M&A advisory commissions. Income from asset management was stable while income from cards had a positive effect.

Net gains and losses on financial items decreased to SEK 245m (336). Negative effects from revaluations of corporate bond holdings were offset by high customer activity in fixed income trading.

Expenses increased by 1 per cent to SEK 1 023m (1 014) mainly due to higher compliance-related expenses.

Credit impairments amounted to SEK 77m (19).

Business development

Demand for financing and advice remained high in the quarter. Lending increased mainly in the real estate, information & communication and manufacturing sectors. Capital market development and activity has been greatly impacted by the war in Ukraine and inflation concerns, which led to higher credit spreads and rising volatility. Terms have worsened in the corporate bond market, mainly for high-yield bonds, because of which a number of planned issues have been delayed. Turnover in government and mortgage bonds has been high as customers turned to assets with lower risk against the backdrop of the market turbulence. Greater caution has also been evident in the stock market with falling prices and high volatility.

Despite this, our corporate and institutional clients finalised a number of bond issues in various currencies that we assisted them with. The majority were at the

beginning of the quarter. Our clients continued to show interest in investing in and issuing sustainable bonds. The bank has among other things served as an advisor to Nordic Investment Bank and real estate companies such as Corem Property Group, Willhem and Balder on their green bond issues.

Swedbank was also active as an advisor in the Nordic stock market in the quarter, including in Gram Car Carriers' IPO and new issues for SATS and Stillfront. Swedbank also advised SBB on its acquisition of Amasten.

During the quarter, new corporate clients were able to register KYC information themselves through the Nordic platform Invidem. Invidem provides information to all leading banks, and customers therefore have to register only once, even if they use several banks. The coordination of information is expected to lead to better data quality and lower costs. The service is being introduced to more customers during the year in all three business areas.

The bank closely dialogues with customers about alternative financing solutions for their refinancing needs and provides additional working capital when for example supply chains are disrupted. For its institutional clients, Swedbank Robur added more staff to better meet demand from the managers of future pensions.

Pål Bergström
Head of Large Corporates & Institutions

Large Corporates & Institutions is responsible for Swedbank's offering to customers with revenues above SEK 2 billion and those whose needs are considered complex due to multinational operations or a need for advanced financing solutions. The business area is also responsible for corporate and capital market products in other parts of the bank and for the Swedish savings banks. Large Corporates & Institutions works closely with customers, who receive advice to create long-term profitability and sustainable growth. The business area is represented in Sweden, Estonia, Latvia, Lithuania, Norway, Finland, Denmark, China, the U.S. and South Africa.

1) Presentation of the Income statement has been changed, see note 28.

2) Other income includes the items Net insurance, Share of profit or loss of associates and joint ventures and Other income from the Group income statement.

Net interest income and net gains and losses on financial items mainly stem from Group Treasury. Other income mainly refers to income from the savings banks. Expenses mainly relate to Group Products & Advice and Group Staffs and are allocated to a large extent.

Result

First quarter 2022 compared with fourth quarter 2021

Profit was largely unchanged at SEK -61m (-62).

Net interest income decreased to SEK 429m (616). Net interest income within Group Treasury decreased to SEK 479m (654) due to the effects of the bank's transfer pricing model in the wake of higher short-term market interest rates.

Net gains and losses on financial items decreased to SEK -303m (-81). Net gains and losses on financial items within Group Treasury decreased to SEK -296m (-73) mainly due to negative valuation changes on derivatives and the liquidity portfolio caused by higher interest rates and credit spreads.

Expenses decreased to SEK 620m (863) mainly due to lower staff costs and consulting and IT expenses.

January – March 2022 compared with January – March 2021

Profit decreased to SEK -61m (98) mainly due to higher expenses.

Net interest income decreased to SEK 429m (483). Group Treasury's net interest income decreased to SEK 479m (529) due to the effects of the bank's transfer pricing model in the wake of higher short-term market interest rates.

Net gains and losses on financial items decreased to SEK -303m (26). Net gains and losses on financial items within Group Treasury decreased to SEK -296m (43) mainly due to negative valuation changes on derivatives and the liquidity portfolio caused by higher interest rates and credit spreads.

Expenses increased to SEK 620m (448) mainly due to higher IT expenses and staff costs.

Group Functions & Other consists of central business support units and the customer advisory unit Group Products & Advice. The central units serve as strategic and administrative support and comprise Accounting & Finance, Communication and Sustainability, Risk, Digital banking & IT, Compliance, Public Affairs, HR and Legal. Group Treasury is responsible for the bank's funding, liquidity and capital planning. Group Treasury sets the prices for all internal deposit and loan flows in the Group through internal interest rates, where the most important parameters are maturity, interest fixing period, currency, and need for liquidity reserves.

For January – March 2022 a gain of SEK 702m (1 584) was recognised in other comprehensive income, relating to remeasurements of defined benefit pension plans. As per 31 March 2022 the discount rate used to calculate the closing pension obligation was 2.96 per cent, compared with 2.10 per cent per 31 December 2021. The inflation assumption was 2.58 per cent compared with 2.30 per cent per 31 December 2021. The changed assumptions together with gains and losses based on experience represented SEK 2 657m of the positive result in other comprehensive income. The fair value of plan assets decreased during January – March 2022 by SEK 1 955m. In total, the obligation for defined benefit pension plans exceeded the fair value of plan assets by SEK 1 038m compared with SEK 1 801m per 31 December 2021.

For January – March 2022 an exchange rate difference of SEK 556m (846) was recognised for the Group's foreign net investments in subsidiaries. The gain related to subsidiaries mainly arose because the Swedish krona weakened against the euro during the period. In addition, an exchange rate difference of SEK 26m (103) for the Group's foreign net investments in associates and joint ventures is included in Share of other comprehensive income of associates and joint ventures. The total gain of SEK 582m is not taxable. The large part of the Group's foreign net investments is hedged against currency risk resulting in a loss of SEK 469m (729) for the hedging instruments.

2022

During the first quarter contributions were provided to joint venture Invidem AB of SEK 22m.

2021

During the year contributions were provided to joint ventures P27 Nordic Payments Platform AB of SEK 25m and Invidem AB of SEK 25m. During the third quarter additional shares were acquired in associate BGC Holding AB of SEK 1m.

During third and fourth quarter, shares in Hemnet Group AB were sold and Swedbank received a cash payment of SEK 110m which are reported in Disposals of/maturity of other fixed assets and strategic financial assets in the cash flow statement.

Note 1 Accounting policies

The interim report has been prepared in accordance with IAS 34 Interim Financial Reporting. The condensed consolidated financial statements have also been prepared in accordance with the recommendations and statements of the Swedish Financial Reporting Board, the Annual Accounts Act for Credit Institutions and Securities Companies and the directives of the SFSA.

The Parent Company report has been prepared in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies, the directives of the SFSA and recommendation RFR 2 of the Swedish Financial Reporting Board.

The accounting policies applied in the interim report conform to those applied in the Annual and Sustainability Report for 2021, which was prepared in accordance with International Financial Reporting Standards as adopted by the European Union and

interpretations thereof. There have been no significant changes to the Group's accounting policies.

New Swedish bank tax and changed presentation of resolution fees

A new Swedish bank tax (Risk tax on credit institutions) was introduced from 1 January 2022 and is presented on a new row in the income statement. From 2022 the Group also presents resolution fees on this row, which is named Swedish bank tax and resolution fees.

Previously the resolution fees have been included in Interest expense within Net interest income.

Comparative figures have been restated, see note 28.

Other changes in accounting regulations

Other amended regulations that have been adopted from 1 January 2022 did not have a significant impact on the Group's financial position, results, cash flows or disclosures.

Note 2 Critical accounting estimates

Presentation of consolidated financial statements in conformity with IFRS requires the executive management to make judgments and estimates that affect the recognised amounts for assets, liabilities and disclosures of contingent assets and liabilities as of the reporting date as well as the recognised income and expenses during the report period. The executive management continuously evaluates these judgments and estimates, including assessing control over investment funds, the fair value of financial instruments, provisions for credit impairment, impairment testing of

goodwill, deferred taxes and defined benefit pension provisions.

Post-model expert credit adjustments to the credit impairment provisions continue to be necessary, given uncertainties surrounding the implications from both the war in Ukraine as well as the Covid-19 economic crisis. Details of these are found in Note 9. Beyond that, there have been no significant changes to the basis upon which the critical accounting judgments and estimates have been determined compared with 31 December 2021.

Note 3 Changes in the Group structure

No significant changes to the Group structure occurred during the first quarter 2022.

Note 4 Operating segments (business areas)

Operating segments accounting policies

The operating segment report is based on Swedbank's accounting policies, organisation and management accounts. Market-based transfer prices are applied between operating segments, while all expenses for Group functions and Group staffs are transfer priced at cost to the operating segments. Cross-border transfer pricing is applied according to OECD transfer pricing guidelines.

The Group's equity attributable to shareholders is allocated to each operating segment based on capital adequacy rules and estimated capital

requirements based on the bank's Internal Capital Adequacy Assessment Process (ICAAP).

The return on allocated equity for the operating segments is calculated based on profit for the period attributable to the shareholders for the operating segment, in relation to average monthly allocated equity for the operating segment. For periods shorter than one year the key ratio is annualised.

During the first quarter of 2022, minor changes between Swedbank's operating segments were made to coincide with organisational changes. Comparative figures have been restated.

During 2021, the Group has reduced its gross exposure in the Shipping and offshore sector through sales and restructuring, resulting in write offs of the gross exposures. The majority of the Stage 3 exposures that were written off were previously provisioned.

Calculation of credit impairment provisions

The measurement of expected credit losses is described in Note G3.1 Credit risks on pages 80-85 of the 2021 Annual and Sustainability Report. There have been no significant changes during the year to the methodology.

Measurement of 12-month and lifetime expected credit losses

The onset of the Covid-19 pandemic in 2020 brought a deterioration of macroeconomic indicators – inter alia GDP growth, housing and property prices, unemployment, oil prices and interest rates – that would typically have contributed to increased credit risk. The increased credit losses or default rates that would be expected from historical experience of similar economic shocks did not materialise due to extraordinary support measures. Some uncertainties regarding lasting economic implications remain and continue to impact recoveries, particularly as the effects of support measures remain in the economy.

The war in Ukraine has exacerbated many of the weaknesses and imbalances in the economy that arose during the pandemic, particularly in relation to supply chain disruptions, shortages of input goods and significantly higher energy prices. Other implications include higher inflation, particularly in the Baltic countries, and earlier than anticipated interest rate hikes. As the credit ratings and quantitative risk models do not yet reflect all potential credit migrations, post-

model adjustments to increase the credit impairment provisions continue to be deemed necessary.

The post-model expert credit adjustments decreased to SEK 1 715m (SEK 1 796m as of 31 December 2021) and are allocated as SEK 1 079m in stage 1, SEK 635m in stage 2 and SEK 1m in stage 3. Customers and industries have been reviewed and analysed considering the current situation, particularly in more vulnerable sectors. The most significant post-model adjustments are in the Shipping and offshore, Manufacturing, Construction, Retail and wholesale, Transportation sectors and Hotel and restaurant.

Determination of a significant increase in credit risk

The tables below show the quantitative thresholds used by the Group for assessing a significant increase in credit risk, namely:

- changes in the 12-month PD and internal risk rating grades, which have been applied for the portfolio of loans originated before 1 January 2018. For instance, for exposures originated with a risk grade between 0 and 5, a downgrade by 1 to 2 grades from initial recognition is assessed as a significant change in credit risk. Alternatively, for exposures originated with a risk grade between 13 and 21, a downgrade by 3 to 8 grades from initial recognition is considered significant. Internal risk ratings are assigned according to the risk management framework outlined in Note G3

Risks in the 2021 Annual and Sustainability Report.

- changes in the lifetime PD, which have been applied for the portfolio of loans originated on or after 1 January 2018. For instance, for exposures originated with a risk grade between 0 and 5, a 50 per cent increase in the lifetime PD from initial recognition is assessed as a significant change in credit risk. Alternatively, for exposures originated with a risk grade between 13 and 21, an increase of 100-300 per cent from initial recognition is considered significant.

These limits reflect a lower sensitivity to change in the low-risk end of the risk scale and a higher sensitivity to change in the high-risk end of the scale. The Group has performed a sensitivity analysis on how credit impairment provisions would change if thresholds applied were increased or decreased. A lower threshold would increase the number of loans that have migrated from Stage 1 to Stage 2 and also increase the estimated credit impairment provisions. A higher threshold would have the opposite effect.

The tables below disclose the impacts of this sensitivity analysis on the credit impairment provisions. Positive amounts represent higher credit impairment provisions that would be recognised.

Significant increase in credit risk - financial instruments with initial recognition before 1 January 2018

Internal risk grade at initial recognition	12-month PD band at initial recognition, %	Threshold, rating downgrade ^{1,2,3}	Impairment provision impact of		Recognised credit impairment provisions 31 Mar 2022	Share of total portfolio in terms of gross carrying amount, % 31 Mar 2022	Impairment provision impact of		Recognised credit impairment provisions 31 Dec 2021	Share of total portfolio in terms of gross carrying amount, % 31 Dec 2021

1) Downgrade by 2 grades corresponds to approximately 100 per cent increase in 12-month PD.

2) Thresholds vary within given ranges depending on the borrower's geography, segment and internal risk grade.

3) The threshold used in the sensitivity analyses is floored to 1 grade.

4) Represents post-model expert credit adjustments for stage 1 and stage 2.

5) Of which provisions for off-balance exposures are SEK 232m (284).

Incorporation of forward-looking macroeconomic scenarios

The Swedbank Economic Outlook was published on 19 January and would typically serve as the baseline scenario. Given the war in Ukraine, an updated baseline scenario was necessary and was updated to 28 March by Swedbank Macro Research, with an assigned probability weight of 66.6 per cent. Aligned with the

updated baseline scenario, new alternative scenarios were developed, with assigned probability weights of 16.7 per cent on both the upside and downside scenario. These new macroeconomic scenarios were included in the expected credit losses calculations according to the Group's monthly process.

1) Unemployment rate, 16-64 years.

Global GDP growth has been revised down substantially for 2022 and 2023 due to the economic consequences of the war in Ukraine. High and volatile energy and commodity prices are expected to dampen household consumption and firms' investments. Mitigating factors, such as expansionary fiscal policy and pent-up demand following the pandemic, will allow global economies to avoid stagnation. However, risks are tilted downwards. The world economy is expected to grow by 2.7 per cent in 2022 and 3.3 per cent in 2023.

No explicit assumptions on developments of the war in Ukraine are made. However, the forecast is based on the assumption that the Western sanctions and boycotts on Russia will remain in place throughout the forecast horizon, i.e., the addition of many more sanctions is not foreseen, nor are the ones in place expected to be lifted. This assumption implies that oil and gas prices are likely to remain high, but not increase further during the forecast horizon.

Although inflation is about to peak soon in many countries, consumer price inflation will be higher than normal for a while yet. The central bank forecasts are being revised and now expect the removal of stimulus to happen much faster than the forecast in November.

The negative effect on GDP growth will be less extensive in Sweden than in most of Europe. However, growth is slowing, and inflation is rising even higher. Monetary policy will tighten sharply in the near term while fiscal policy becomes more expansionary than the forecast in November.

Baltic trade exposure to Russia is not extensive; nevertheless, the economic effects will be noticeable. Even higher inflation, a deterioration in sentiment, a decline in investments and exports are likely to cause GDP growth to decline sharply. Governments are implementing sizeable measures to cushion negative economic consequences and help households deal with inflation.

Sensitivity

Set out below are the credit impairment provisions that would result from the negative and positive scenarios, which are considered reasonably possible, being assigned probabilities of 100 per cent. Post-model expert credit adjustments are assumed to be constant in the results.

1) Financial leasing agreements, when the Group is acting as lessor, are included in the valuation category Amortised cost since they are covered by provisions for expected credit losses.

2) Nominal amount of debt securities in issue designated at fair value through profit or loss was SEK 102m.

Note 20 Financial instruments recognised at fair value

The determination of fair value, the valuation hierarchy and the valuation process for fair value measurements in Level 3 are described in the Annual and Sustainability Report 2021, note G46 Fair value of financial instruments

The financial instruments are distributed in three levels depending on inputs to the measurement.

- Level 1: Unadjusted quoted price on an active market
- Level 2: Adjusted quoted price or valuation model with valuation parameters derived from an active market
- Level 3: Valuation model where significant valuation parameters are non-observable and based on internal assumptions

The following tables present fair values of financial instruments recognised at fair value split between the three valuation hierarchy levels.

SEKm	31 Mar 2022				31 Dec 2021			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

Closing balance 31 March	1 344	21		139	1 504	1 148	8	1 156

Financial instruments are transferred to or from level 3 depending on whether the internal assumptions have changed in significance to the valuation.

The level 3 unlisted equity instruments include strategic investments. Swedbank's holdings in VISA Inc. C shares are subject to selling restrictions until June 2028 and under certain conditions may have to be returned.

Liquid quotes are not available for these shares, therefore the fair value is established with significant elements of Swedbank's own internal assumptions. As of 31 March 2022, the carrying amount for the holdings in Visa Inc. C amounts to SEK 753m (599).

In the Group's insurance operations, fund units are held in which the customers have chosen to invest their

insurance savings. The holdings are reported in the balance sheet as financial assets where the customers bear the investment risk and are normally measured at fair value according to level 1, because the units are traded in an active market. The Group's obligations to insurance savers are reported as financial liabilities where the customers bear the investment risk because it is the customers who bear the entire market value change of the assets. The liabilities are normally measured at fair value according to level 2.

During the first quarter 2022, trading was closed in whole or in part in Russia and Eastern Europe targeted funds. These unit holdings and liabilities to the insurance savers have therefor been transferred and measured to fair value according to level 3. Fully closed funds have been measured at a value of SEK 0m, while funds that were open for sales have been measured at the sale value. The liabilities have been measured on the same basis.

1) The pledge is defined as the borrower's nominal debt including accrued interest and refers to the loans of the total available collateral that are used as the pledge at each point in time

The 31 March 2021 amount for Loans granted but not paid has been restated due to a change in the scope of agreements included.

Swedbank is cooperating with authorities in the United States who are conducting investigations into Swedbank's historic AML compliance and the Group's response thereto, as well as related issues involving the Group's anti-money laundering controls and certain individuals and entities who may at some time have been customers of the Group.

Swedbank AS in Estonia has been informed by the Estonian Prosecutor that Swedbank AS is suspected of money laundering during the period 2014-2016.

The timing of the completion of the investigations is still unknown and the outcome is still uncertain. At present, it is not possible to reliably estimate the amount of any potential settlement or fines, which could be material.

Note 22 Offsetting financial assets and liabilities

The tables below present recognised financial instruments that have been offset in the balance sheet under IAS 32 and those that are subject to legally enforceable master netting or similar agreements but do not qualify for offset. Such financial instruments relate to derivatives, repurchase and reverse repurchase agreements, securities settlements, securities borrowing and lending transactions. Collateral amounts represent financial instruments or cash collateral received or pledged for transactions that are subject to a legally

enforceable master netting or similar agreements and which allow for the netting of obligations against the counterparty in the event of a default. Collateral amounts are limited to the amount of the related instruments presented in the balance sheet; therefore any over-collateralisation is not included. Amounts that are not offset in the balance sheet are presented as a reduction to the financial assets or liabilities in order to derive net asset and net liability exposure.

SEKm	Financial assets			Financial liabilities		
	31 Mar 2022	31 Dec 2021	31 Mar 2021	31 Mar 2022	31 Dec 2021	31 Mar 2021
Financial assets and liabilities, which have been offset or are subject to netting						
Gross amount	675 026	272 413	255 101	663 704	238 400	241 517
Offset amount	-589 684	-207 036	-148 713	-587 446	-204 845	-153 595
Net amounts presented in the balance sheet	85 342	65 377	106 388	76 258	33 555	87 922
Related amounts not offset in the balance sheet						
Financial instruments, netting arrangements	34 932	19 292	37 760	34 932	19 264	37 760
Financial Instruments, collateral	30 477	23 519	38 528	24 688	9 469	41 037
Cash collateral	8 345	13 850	17 647	12 931	4 801	9 125
Total amount not offset in the balance sheet	73 754	56 661	93 935	72 551	33 534	87 922
Net amount	11 588	8 716	12 453	3 707	21	0

The amount offset for derivative assets includes offset cash collateral of SEK 9 848m (1 447) derived from the balance sheet item Amounts owed to credit institutions. The amount offset for derivative liabilities includes offset

cash collateral of SEK 7 610m (2 249), derived from the balance sheet item Loans to credit institutions. As of 31 March 2022, offset amounts for security settlement claims and liabilities are included in the table above.

Note 23 Capital adequacy, consolidated situation

The note contains the information made public according to the Swedish Financial Supervisory Authority Regulation FFFS 2014:12, chap. 8. Additional periodic information according to Regulation (EU) No 575/2013 of the European Parliament and of the Council on supervisory requirements for credit institutions and Implementing Regulation (EU) No 1423/2013 of the European Commission can be found on Swedbank's website: www.swedbank.com/investor-relations/reports-and-presentations/risk-reports

In the consolidated situation the Group's insurance companies are consolidated according to the equity method instead of full consolidation. The EnterCard Group is consolidated by proportional method instead of the equity method. Otherwise, same principles for consolidations are applied as for the Group.

Note 24 Internal capital requirement

This note provides information on the internal capital assessment according to chapter 8, section 5 of the SFSA's regulation on prudential requirements and capital buffers (2014:12). The internal capital assessment is published in the interim report according to chapter 8, section 4 of the SFSA's regulation and general advice on annual reports from credit institutions and investment firms (2008:25).

A bank must identify, measure and manage the risks with which its activities are associated and have sufficient capital to cover these risks. The purpose of the Internal Capital Adequacy Assessment Process (ICAAP) is to ensure that the bank is sufficiently capitalised to cover its risks and to conduct and develop its business activities. Swedbank applies its own models and processes to evaluate its capital need for all relevant risks. The models that serve as a basis for the internal capital assessment evaluate the need for economic capital over a one-year horizon at a 99.9% confidence level for each type of risk. Diversification effects between various types of risks are not taken into account in the calculation of economic capital.

As a complement to the economic capital calculation, scenario-based simulations and stress tests are conducted at least once a year. The analyses provide an overview of the most important risks Swedbank is exposed to by quantifying their impact on the income statement and balance sheet

as well as the own funds and risk-weighted assets. The purpose is to ensure efficient use of capital. The methodology serves as a basis of proactive risk and capital management.

As of 31 March 2022, the internal capital assessment for Swedbank's consolidated situation amounted to SEK 36.9bn (SEK 36.6bn as of 31 December 2021). The capital to meet the internal capital assessment, i.e. the Common Equity Tier 1, amounted to SEK 157bn (SEK 158.6bn as of 31 December 2021) (see Note 23). Swedbank's internal capital assessment using its own models is not comparable with the estimated capital requirement that the SFSA releases quarterly and does not consider the SFSA risk-weight floor for Swedish mortgages.

The internally estimated capital requirement for the parent company is SEK 29.4bn (SEK 25.3bn as of 31 December 2021) and the Common Equity Tier 1 capital amounted to SEK 124bn (SEK 126.1bn as of 31 December 2021) (see the parent company's note on capital adequacy).

In addition to what is stated in this interim report, risk management and capital adequacy according to the Basel 3 framework are described in more detail in Swedbank's annual report for 2020 as well as in Swedbank's yearly Risk and Capital Adequacy Report, available on www.swedbank.se.

Note 25 Risks and uncertainties

Swedbank's earnings are affected by changes in the global marketplace over which it has no control, including macroeconomic factors such as GDP, asset prices and unemployment as well as changes in interest rates, equity prices and exchange rates. Covid-19 may continue to have consequences on Swedbank. The war in Ukraine has led to previous economic forecasts being revised downwards.

Geopolitical situation

The geopolitical tension built up during 2021 culminated in February in conjunction with the beginning of the war in Ukraine. The war has resulted in that e.g. the US and the EU have decided on far-reaching sanctions against sanction targets and exclusion of a number of Russian banks from the Swift Payment System. Assets have been frozen for many of these targets including Central Bank of Russia. Many foreign firms with business in Russia have communicated that they will exit their Russian investments. Although Swedbank's direct as well as indirect exposures to Russia, Ukraine and Belarus are limited, there is an overall dependence on Russian energy, in particular for the Baltic economies. So far, the war in Ukraine has led to an increase in inflation and a more unstable macroeconomic environment. The current high inflation with increased prices on goods and services could affect peoples' purchasing power and interest rates. The fact that the conflict

countries are large producers of several food related groceries and input goods, in combination with rising energy prices and extended sanctions against Russia, adds to the risk of sustained high inflation. Swedbank closely monitors the geopolitical and macroeconomic developments.

Anti-money laundering and Counter terrorist financing and other compliance risks

For risks related to the ongoing investigations of authorities in US and Estonia related to historic anti-money laundering compliance and response related to anti-money laundering controls, please refer to Note 21 Assets pledged, contingent liabilities and commitments.

Due to the Geopolitical situation in Russia and Ukraine the sanction risk has been elevated. Many new sanctions regimes have entered or are to enter in to force in very close future, however these are managed by a specific sanctions task force and closely daily follow ups of the latest development. Sanctions regimes are continuously implemented in the Swedbank's screening systems and investigational resources have been allocated. Numbers of freezed assets and rejected transactions are rather limited so far. Risk of anti-money laundering and terrorist financing elevations is yet to be assessed.

In addition to the observations reported on money laundering and terrorist financing, Swedbank has

previously identified elevated compliance risks within the bank related to internal governance as noted by supervisory authorities in their investigations of money laundering. In this regard, Swedbank assesses that the deficiencies identified by the supervisory authorities have been addressed by the bank, and to a large extent remediated. Swedbank has previously identified elevated compliance risks in the customer protection area which have now been addressed. Swedbank has also identified elevated compliance risks in the market surveillance area. Work is ongoing within the bank to address the deficiencies identified. Swedbank's Compliance function monitors this work.

Tax

The tax area is complex and leaves room for judgement. Practices and interpretations of applicable laws can be changed, sometimes retroactively. In the event that the tax authorities and, where appropriate, the tax courts decide on a different interpretation than what Swedbank initially made, it could impact the Group's operations, results and financial position.

In addition to what is stated in this interim report, detailed descriptions are provided in Swedbank's 2021 Annual and sustainability report and in the disclosure in the Risk Management and Capital Adequacy reports available at www.swedbank.com.

Note 28 Changed presentation regarding resolution fees

A new Swedish bank tax was introduced from 1 January 2022 and is presented on a new row in the income statement. From 2022 the Group also presents resolution fees on this row, which is named Swedish bank tax and resolution fees. Previously the resolution fees have been included in Interest expense within Net interest income. During 2021, certain derivatives have also been transferred between interest income and interest expenses.

1) From 2022 a Swedish bank tax has been enacted. The new tax is presented on an own row in the Income statement before operating profit. At the same time the presentation of the parent's resolution fee is amended. The resolution fee is moved from Interest rate expense to the same row as the Swedish bank tax in the Income statement. The row is named Swedish bank tax and resolution fees. Comparatives related to the resolution fee has been restated. The parent's interest expense has decreased with SEK 76m for the fourth quarter 2021 and with SEK 91m for the first quarter 2021. During 2021, certain derivative were also transferred between interest income and interest expenses.

Alternative performance measures

Swedbank prepares its financial statements in accordance with IFRS as adopted by the EU, as set out in Note 1. The interim report includes a number of alternative performance measures, which exclude certain items that management believes are not representative of the underlying/ongoing performance of the business. Therefore the alternative performance measures provide more comparative information between periods. Management believes that inclusion of these measures provides information to the readers that enable comparability between periods.

Measure and definition	Purpose
Net investment margin before trading interest is deducted Calculated as Net interest income before trading-related interest is deducted, in relation to average total assets. The average is calculated using month-end figures ¹⁾ including the prior year end. The nearest IFRS measure is Net interest income and can be reconciled in Note 5.	Considers all interest income and interest expense, independent of how it has been presented in the income statement.
Allocated equity Allocated equity is the operating segment's equity measure and is not directly required by IFRS. The Group's equity attributable to shareholders is allocated to each operating segment based on capital adequacy rules and estimated capital requirements based on the bank's internal Capital Adequacy Assessment Process (ICAAP). The allocated equity amounts per operating segment are reconciled to the Group Total equity, the nearest IFRS measure, in Note 4.	Used by Group management for internal governance and operating segment performance management purposes.
Return on allocated equity Calculated based on profit for the period (annualised) attributable to the shareholders for the operating segment, in relation to average allocated equity for the operating segment. The average is calculated using month-end figures ¹⁾ including the prior year end. The allocated equity amounts per operating segment are reconciled to the Group Total equity, the nearest IFRS measure, in Note 4.	Used by Group management for internal governance and operating segment performance management purposes.
Other alternative performance measures These measures are defined in Fact book on page 78 and are calculated from the financial statements without adjustment. <ul style="list-style-type: none"> • Share of Stage 1 loans, gross • Share of Stage 2 loans, gross • Share of Stage 3 loans, gross • Cost/Income ratio • Equity per share • Credit Impairment ratio • Credit impairment provision ratio Stage 1 loans • Credit impairment provision ratio Stage 2 loans • Credit impairment provision ratio Stage 3 loans • Return on equity¹⁾ • Total credit impairment provision ratio • Loan/Deposit ratio 	Used by Group management for internal governance and operating segment performance management purposes.

¹⁾ The month-end figures used in the calculation of the average can be found on page 71 of the Fact book.

Signatures of the Board of Directors and the President

The Board of Directors and the President hereby certify that the Interim report for January-March 2022 provides a fair and accurate overview of the operations, position and results of the parent company and the Group and describes the significant risks and uncertainties faced by the parent company and the companies in the Group.

Review report

Introduction

We have reviewed the condensed interim financial information (interim report) of Swedbank AB (publ) as of 31 March 2022 and the three-month period then ended. The Board of Directors and the CEO are responsible for the preparation and presentation of the interim financial information in accordance with IAS 34 and the Annual accounts act for credit institutions and securities companies. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, ISA, and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Annual accounts act for credit institutions and securities companies, regarding the Group, and with the Annual accounts act for credit institutions and securities companies, regarding the Parent Company.
